A GUIDE TO **ENDNOTE**

PURPOSE OF DOCUMENT

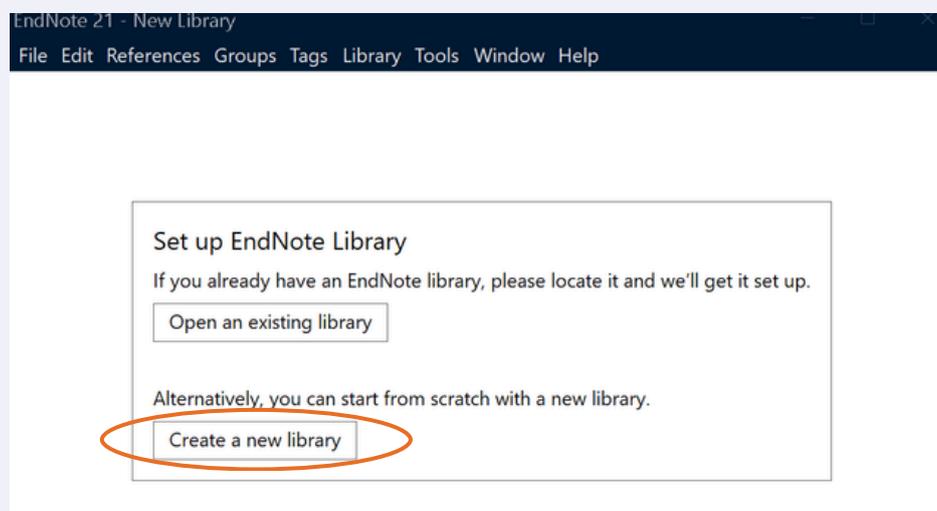

This guide is designed to help students download, set up and navigate the referencing software EndNote.

CONTENTS

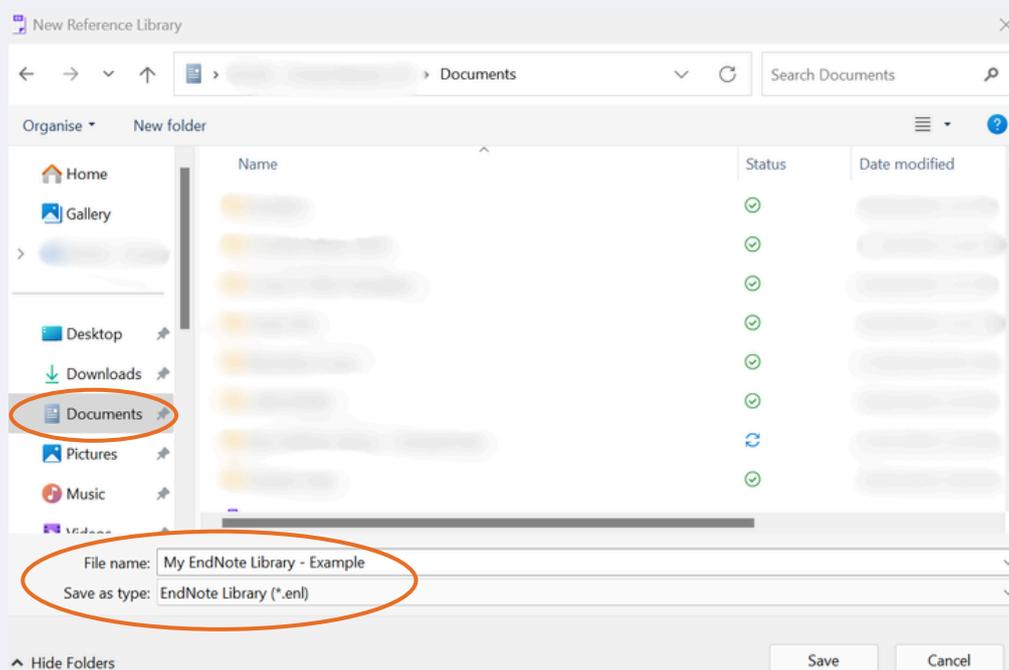

Downloading EndNote	1
Using EndNote	3
Adjusting the Referencing Style	8
Creating Groups of Referencing	14
Cite While You Write (CWYW)	16
EndNote Web	23
○ Syncing your EndNote libraries	
○ Adding references	
○ Checking for missed citations/references	
○ Exporting references from EndNote Web	
○ Exporting the reference list	
EndNote Click	31

DOWNLOADING THE ENDNOTE APPLICATION

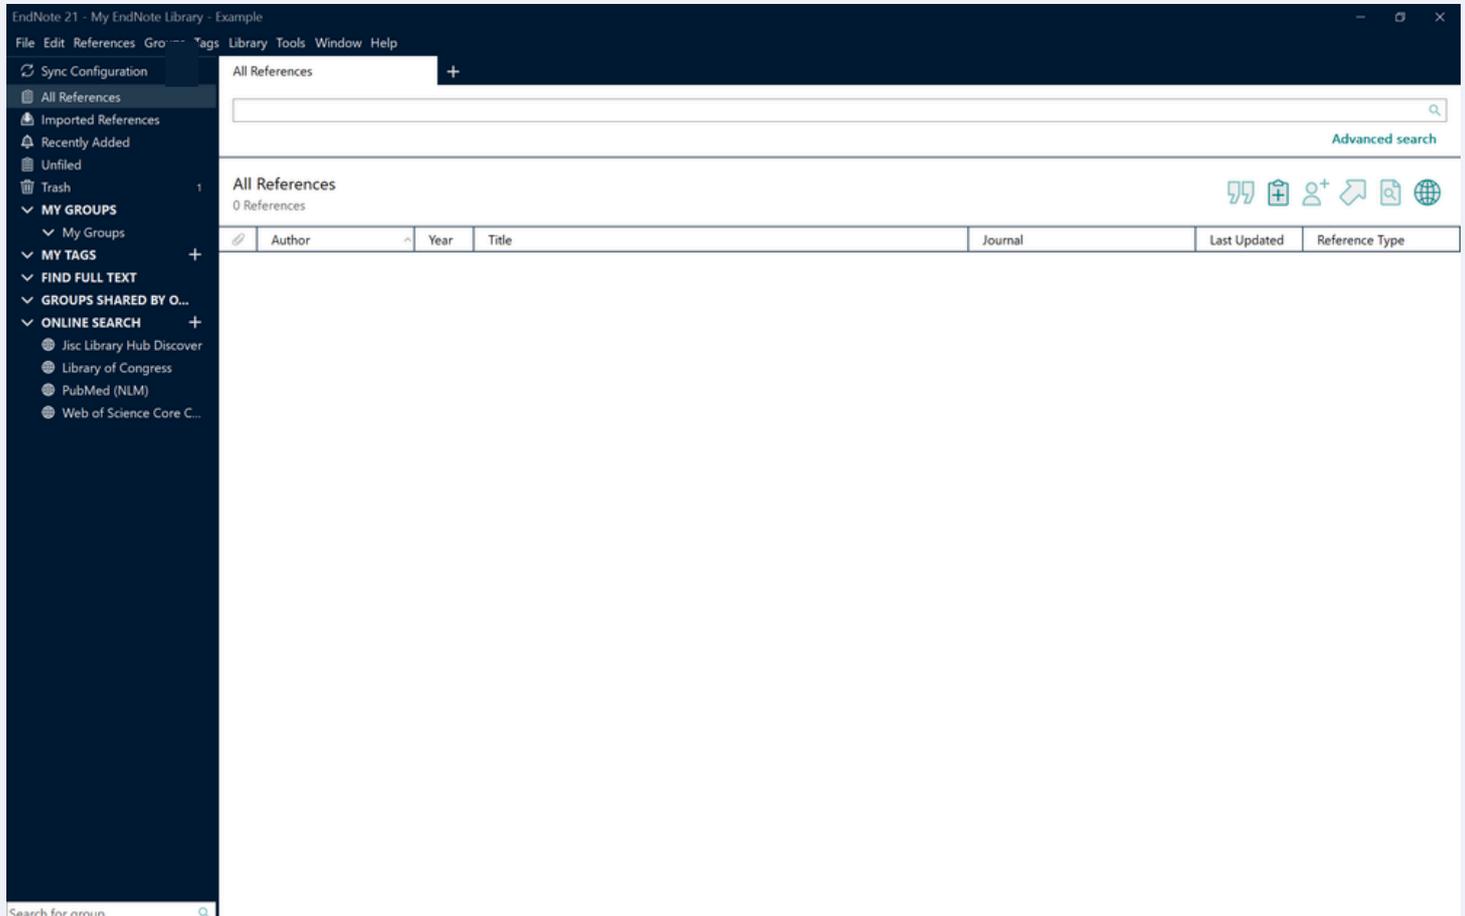

- 1 Download the newest EndNote application (21) through your university's library resources. Try googling "EndNote download [university]".
- 2 Once you've downloaded EndNote, launch the application and proceed with the setup instructions provided.
- 3 When setting up EndNote, a prompt will come up regarding your EndNote library. Select the "Create a new library" option.

- 4 Chose a location in your computer files to save your EndNote library to. Saving in the "Documents" folder is recommended on the local drive. Do not save in cloud-synced folders like OneDrive or Google Drive - this could result in file corruption. Ensure a suitable "File name" is chosen and the "Save as type" is EndNote Library (*.enl).

- 5 Your EndNote library will now open, looking like the image below. It is recommended that you only have one EndNote library to simplify your file management, ensure successful syncing between devices/EndNote Online and avoid citation errors. You will be able to organise your references once in EndNote (see page 14 of this guide).

USING ENDNOTE

6

There are multiple methods to export a source/citation for referencing in your assignment. One common approach is depicted in the image below. Click on the "Cite" button of the desired source and choose to export it as an "EndNote" file ("RIS" file or "NBIB" file if the specific "EndNote" file type is unavailable) when prompted.

The image shows a Google Scholar search for "why dogs are better than cats". The search results list several articles. The third article, "Pet-human relationships: Dogs versus cats" by MT González-Ramírez and R Landero-Hernández, is selected. The "Cite" button for this article is circled in orange. A dropdown menu is open, showing citation styles: MLA, APA, Chicago, Harvard, and Vancouver. The "EndNote" option is circled in orange, and an orange arrow points from the "Cite" button to it.

Pet-human relationships: Dogs versus cats

M. T. González-Ramírez and R. Landero-Hernández

Animals 2021 Vol. 11 Issue 9 Pages 2745

Manage tags

Annotated Insert Copy

González-Ramírez, M. T. and R. Landero-Hernández (2021). "Pet-human relationships: Dogs versus cats." *Animals* 11(9): 2745.

- 8 Clicking on the reference in EndNote will expand the side panel to display additional information (**Summary**). Here, you can modify the reference details (**Edit**) and attach a PDF version of the source (**PDF**) to keep it linked with the reference in EndNote.

The screenshot shows the EndNote 21 interface. The main window displays a list of imported references in a table. A mouse cursor is clicking on a reference, which has triggered the expansion of a side panel on the right. The side panel shows the reference details, including the title, authors, and publication information. The side panel also includes options to edit the reference, attach a PDF, and manage tags.

The table of references is as follows:

Author	Year	Title	Journal	Last Updated	Reference Type
González-Ramírez, Mó...	2021	Pet-human ...	Animals	03/07/2024	Journal Article

The side panel shows the following information:

- Reference ID: Gon..., 2021 #1
- Options: Summary, Edit, PDF, Attach file, Settings, Close
- Attachment button: + Attach file
- Title: Pet-human relationships: Dogs versus cats
- Authors: M. T. González-Ramírez and R. Landero-Hernández
- Publication: Animals 2021 Vol. 11 Issue 9 Pages 2745
- Manage tags button
- Annotation options: Annotated, Insert, Copy
- Summary text: González-Ramírez, M. T. and R. Landero-Hernández (2021). "Pet-human relationships: Dogs versus cats." *Animals* 11(9): 2745.

9 Adding or linking your source to your EndNote reference can be very helpful. To do this, you can download the source to your computer and attach it to your EndNote reference using the “+ Attach File” button.

Alternatively, you can right-click on the reference* and select “Find Full Text.” EndNote will try to locate the source online and connect it to the reference. You can follow its progress under the “FIND FULL TEXT” section in the sidebar. Please note that EndNote may not always succeed in finding the source, so you might need to manually attach the file as described above.

Once attached, the source saves as a PDF and can be found in the “PDF” section of the reference.

*Please note that typically only journal articles will be able to be connected to your reference by the “Find Full Text” function.

The screenshot displays the EndNote application window. On the left, a sidebar contains navigation options such as 'All References', 'Recently Added', 'Unfiled', 'Trash', 'MY GROUPS', 'MY TAGS', and 'ONLINE SEARCH'. The 'MY TAGS' section is expanded, and the 'FIND FULL TEXT' tag is circled in red. The main pane shows a table of references. The second reference is selected, and a context menu is open over it. The 'Find Full Text' option in the menu is also circled in red. To the right, a detailed view of the selected reference is shown, including the title 'Pet-Human Relationships: Dogs versus Cats', authors, journal information, and a full-text abstract. The 'Attach file' button in the top right of this view is circled in red.

González-Ramírez, M. ...	2021	Pet-Human ...	Animals (Basel)		Journal Article

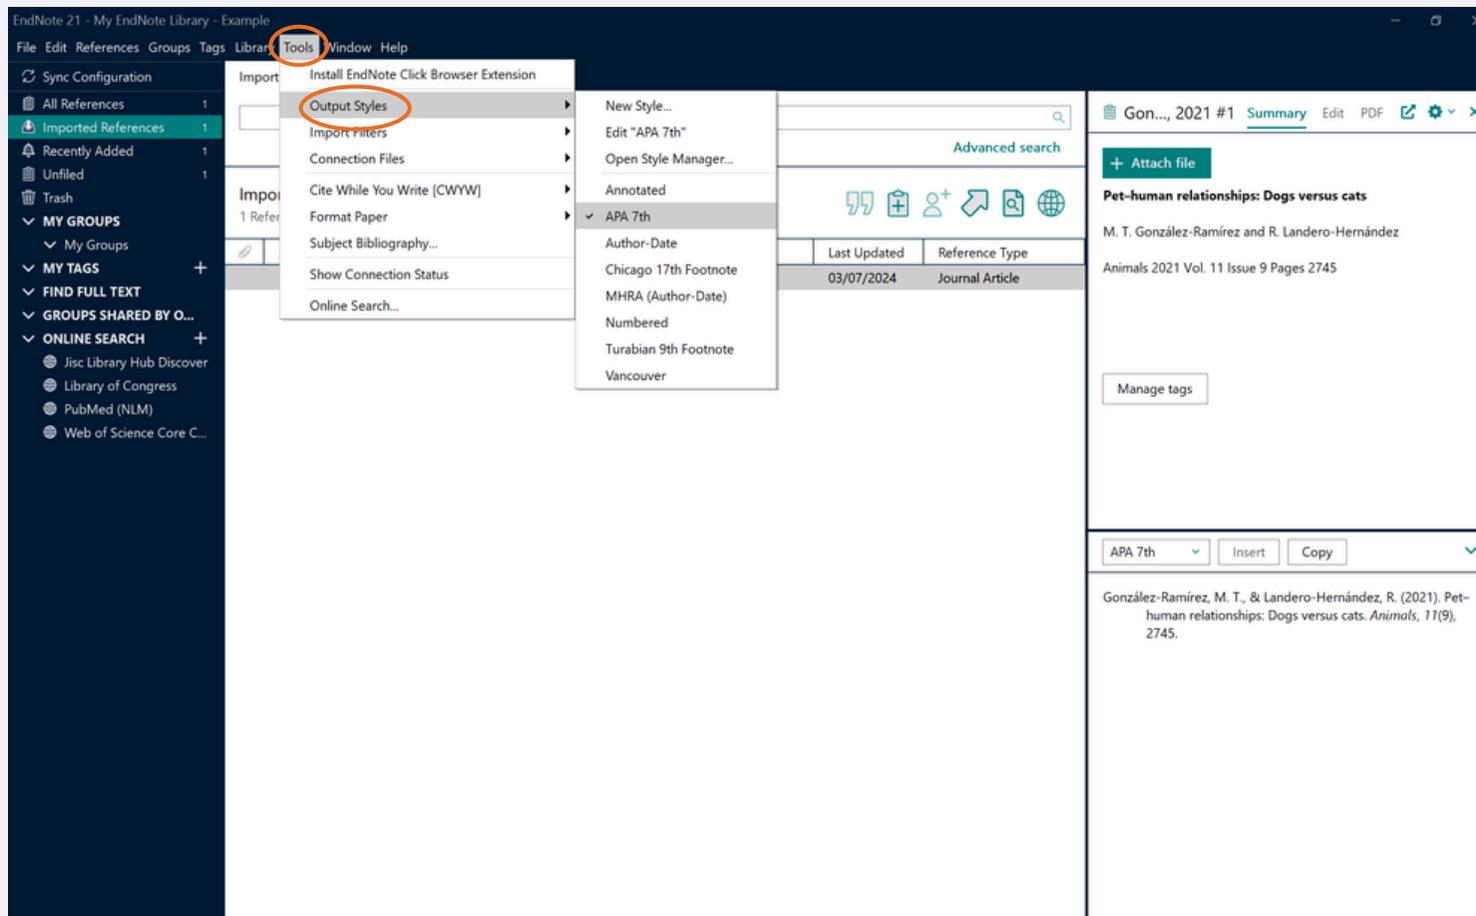

10

Remember to regularly save your EndNote library by selecting “File” from the top menu and then clicking “Save.” It’s also a good idea to periodically save copies of your EndNote library for extra security, replacing the file to ensure there is not a buildup of copies. To do this, go to “File” in the top menu and choose “Save a Copy...” and follow the prompts to save over an existing backup copy.

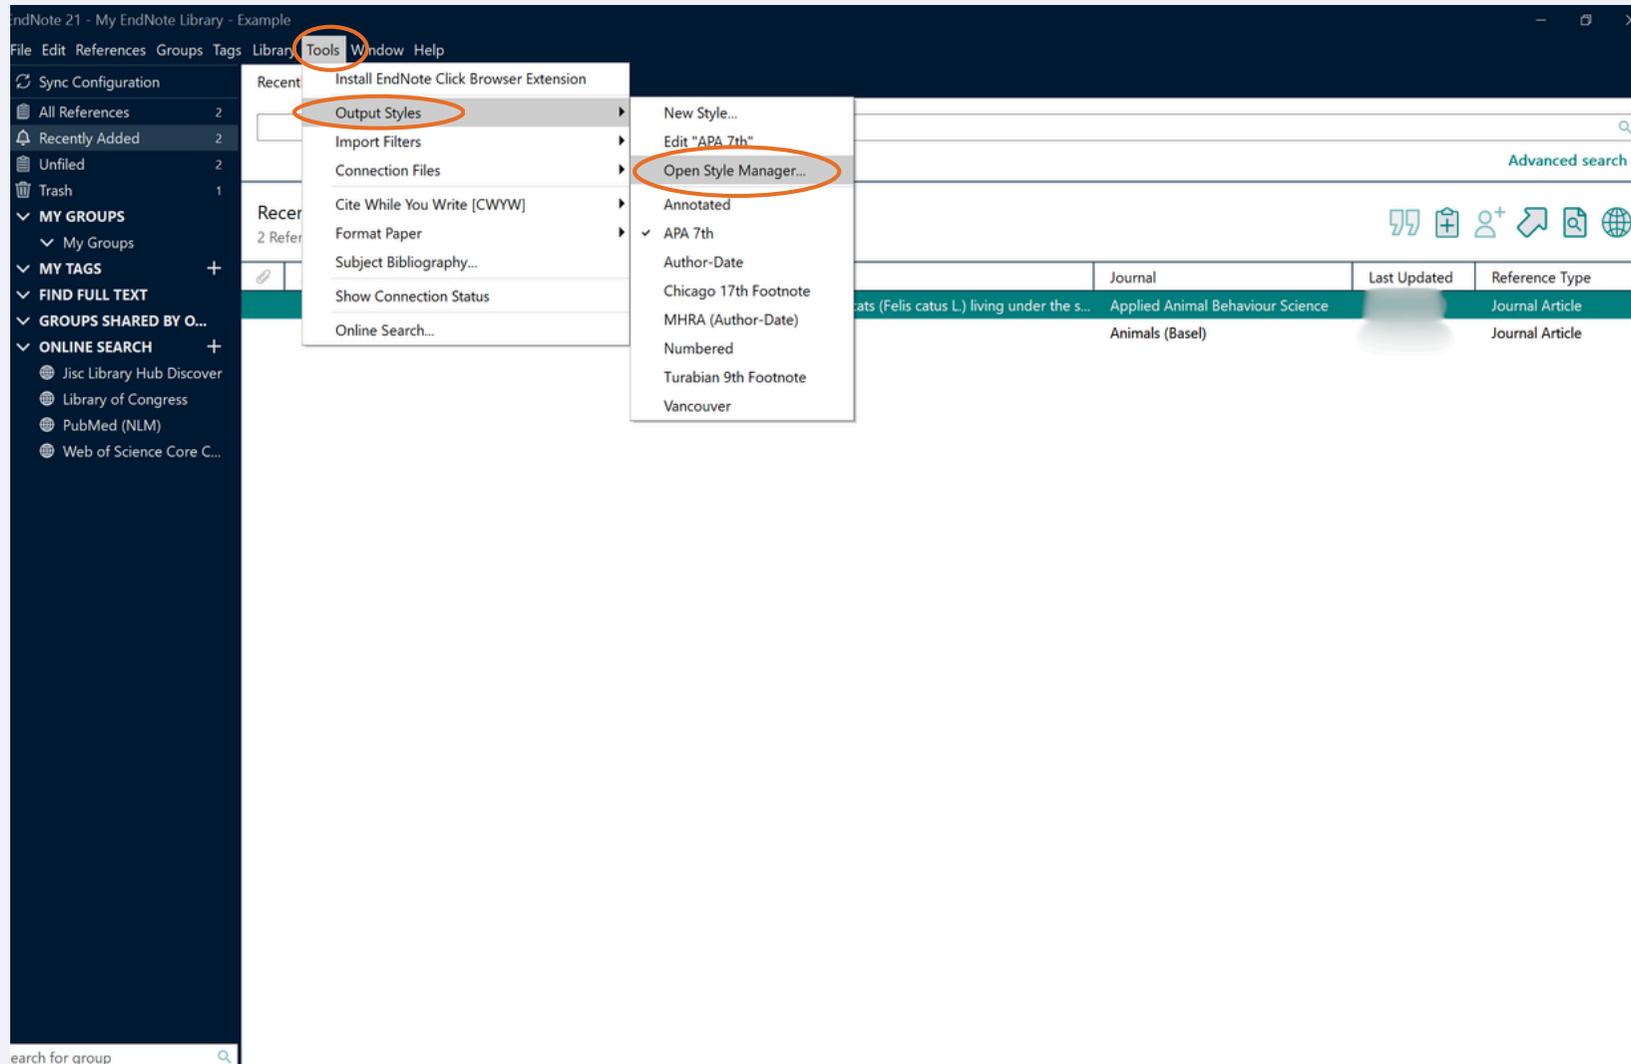

ADJUSTING THE REFERENCING STYLE

To adjust the referencing format or style (e.g., APA 7 or Harvard), select the "Tools" option from the top menu, then click on "Output Styles". From there, you can choose the specific referencing style you need. Many universities have their own preferred styles for citations and referencing, so it's advisable to consult your library to ensure you are following the correct guidelines.

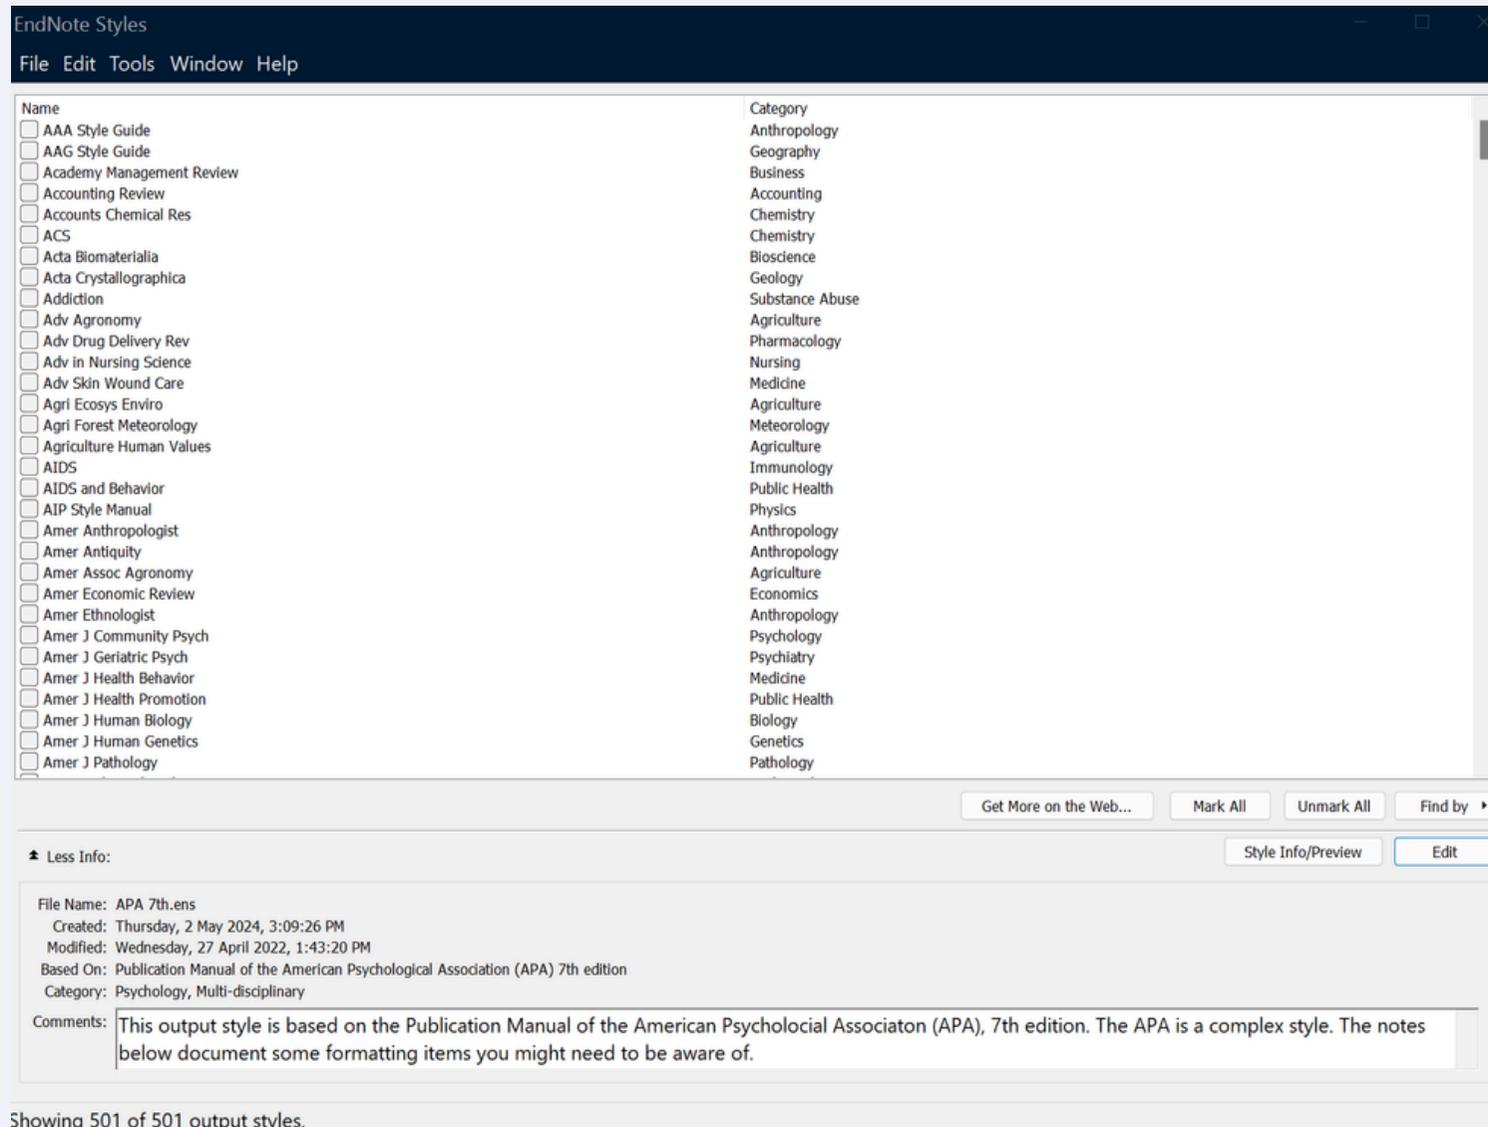

*Note: You may need to download and add your university's specific referencing style to the EndNote application if it's not already available.

To add a referencing style to your EndNote that is not seen in the short list, click on “Tools”, then “Output Styles” and finally “Open Style Manager...”.

The “Style Manager” looks like the image below. Here, you can find other referencing types. Tick the small box next to the reference to add it to your “Output Styles” in EndNote.

*To download an EndNote reference style, check with your university library resources. Alternatively, Google search “EndNote download [university]”. For example, UC has an “[EndNote Styles](#)” section on their EndNote information page. The 2021 Harvard Style will be downloaded for this example.

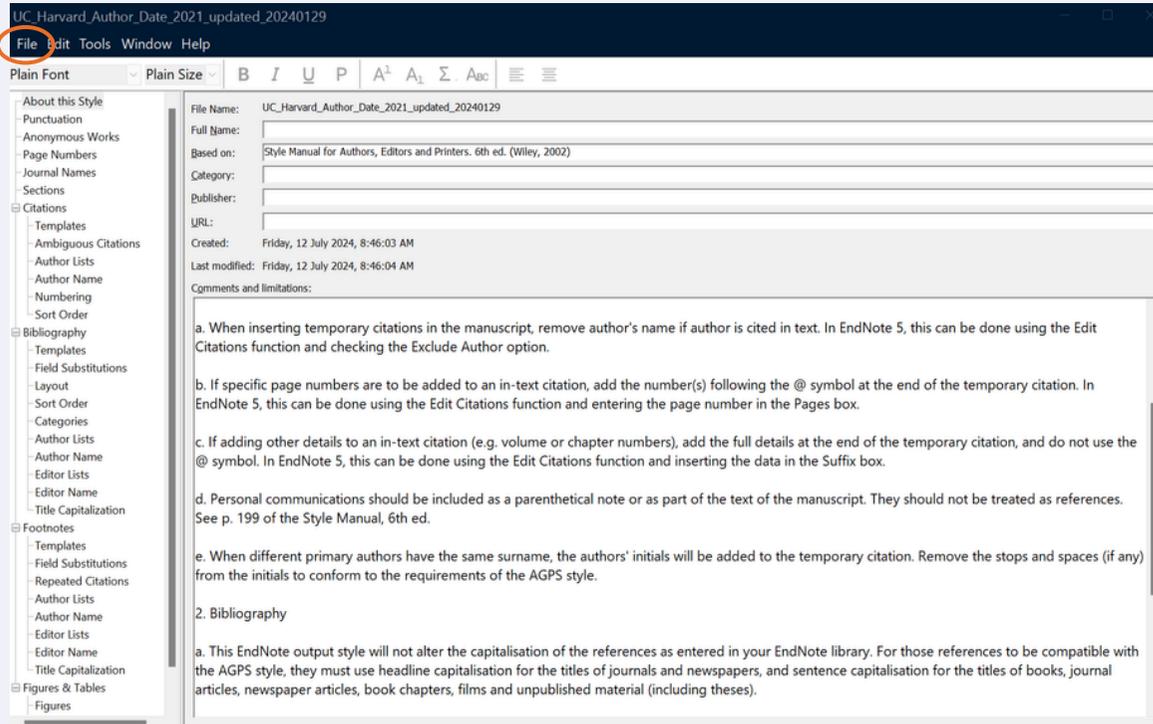

EndNote Styles

These are EndNote Styles written for staff and students of the University of Canberra. These styles should be used in conjunction with the UC Referencing Guide.

- [UC APA 7th ed](#)
This style is created by the University of Canberra.
- [UC Harvard 2021 Style](#)
This style is created by the University of Canberra and is based on the online edition (2021) of the Australian Government Style Manual.
- [UC Chicago 17th Author Date](#)
This style is created by the University of Canberra.
- [UC Chicago 17th Footnote Style](#)
This style is created by the University of Canberra.
- [UC Vancouver Numeric](#)
This style is created by the University of Canberra. This style uses abbreviated journal titles. See - <http://canberra.libanswers.com/a.php?qid=513602>
- [UC Vancouver Superscript](#)
This style is created by the University of Canberra. This style uses abbreviated journal titles see- <http://canberra.libanswers.com/a.php?qid=513602>
- [UC AGLC 3rd ed](#)
- [Using EndNote with AGLC3](#)

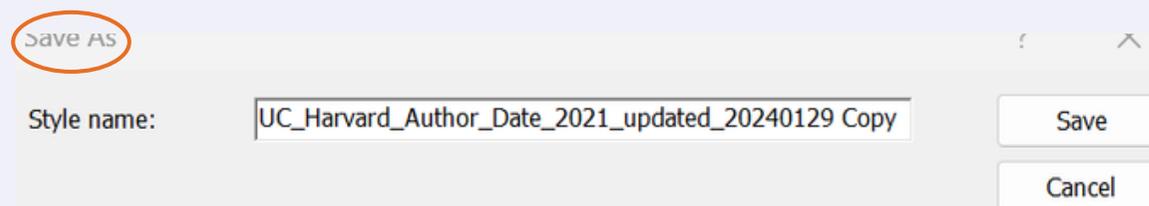

If you are using the IEEE Referencing Style you can download the EndNote IEEE style below.

- [IEEE Referencing Style](#)

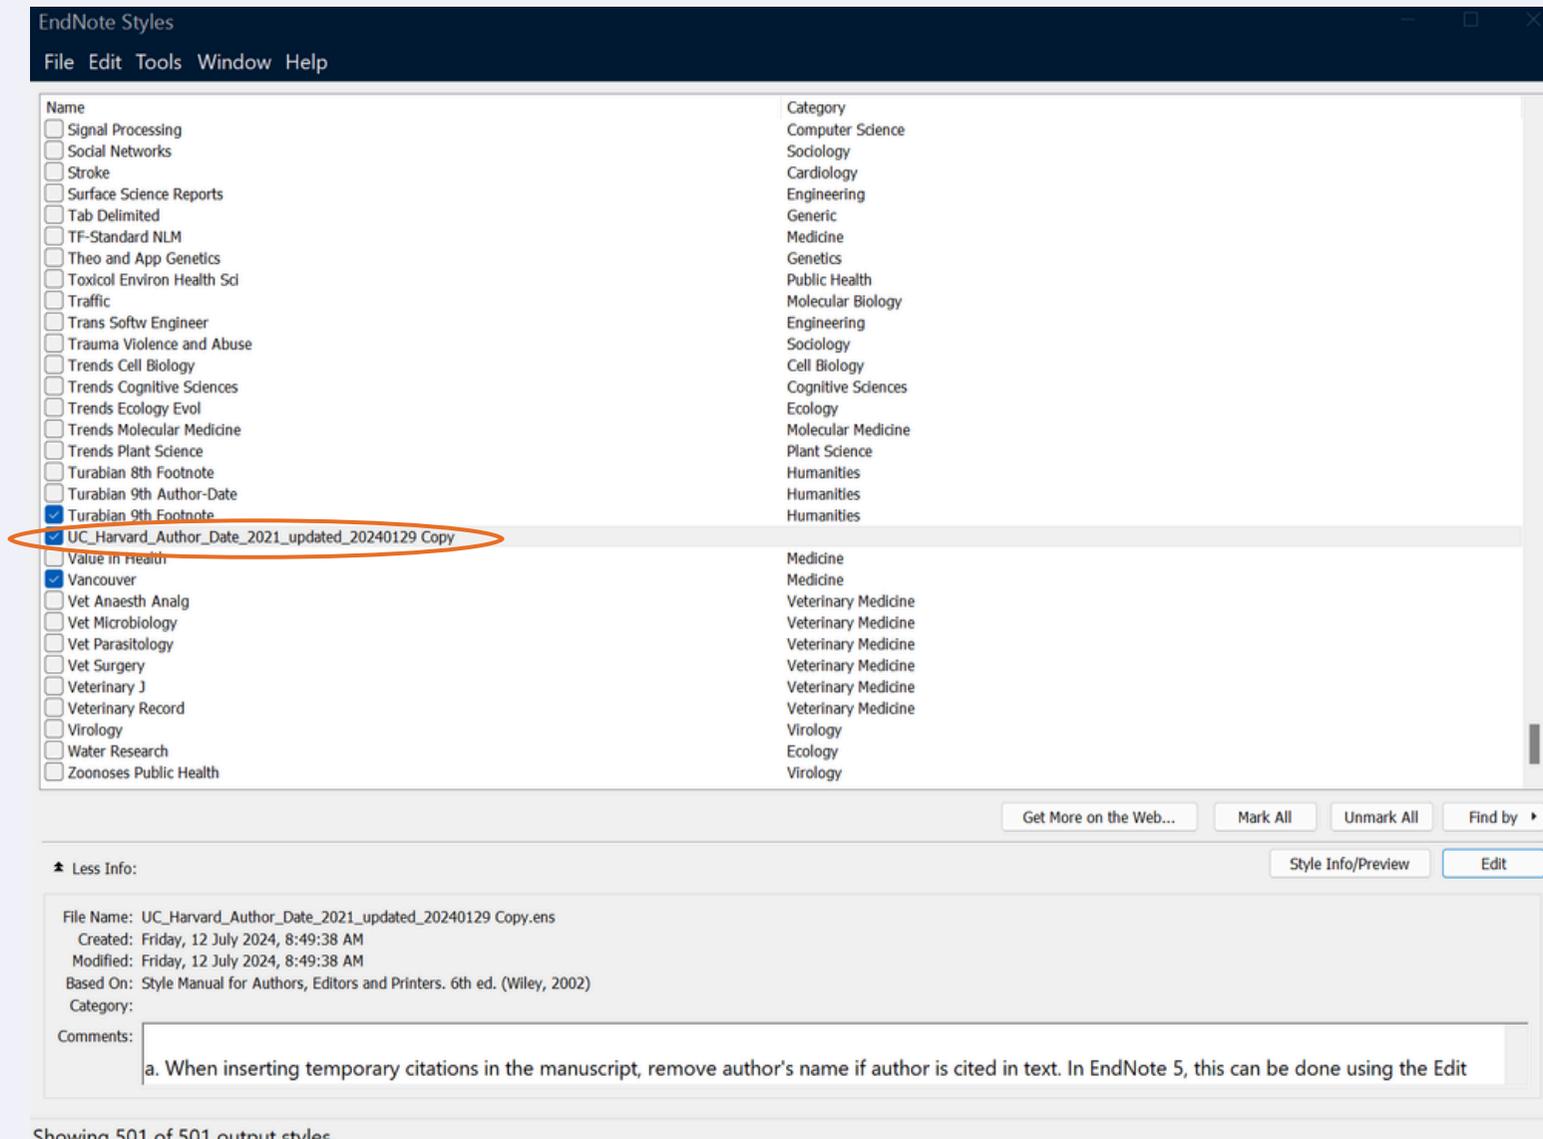

*Once downloaded, the EndNote Style will appear in the “Downloads” folder of your computer.

1. Click on the **download** to open the EndNote style.
2. Then click on “File” in the top menu.
3. Click “Save As” and save the EndNote style (remember the name in which you saved the style).

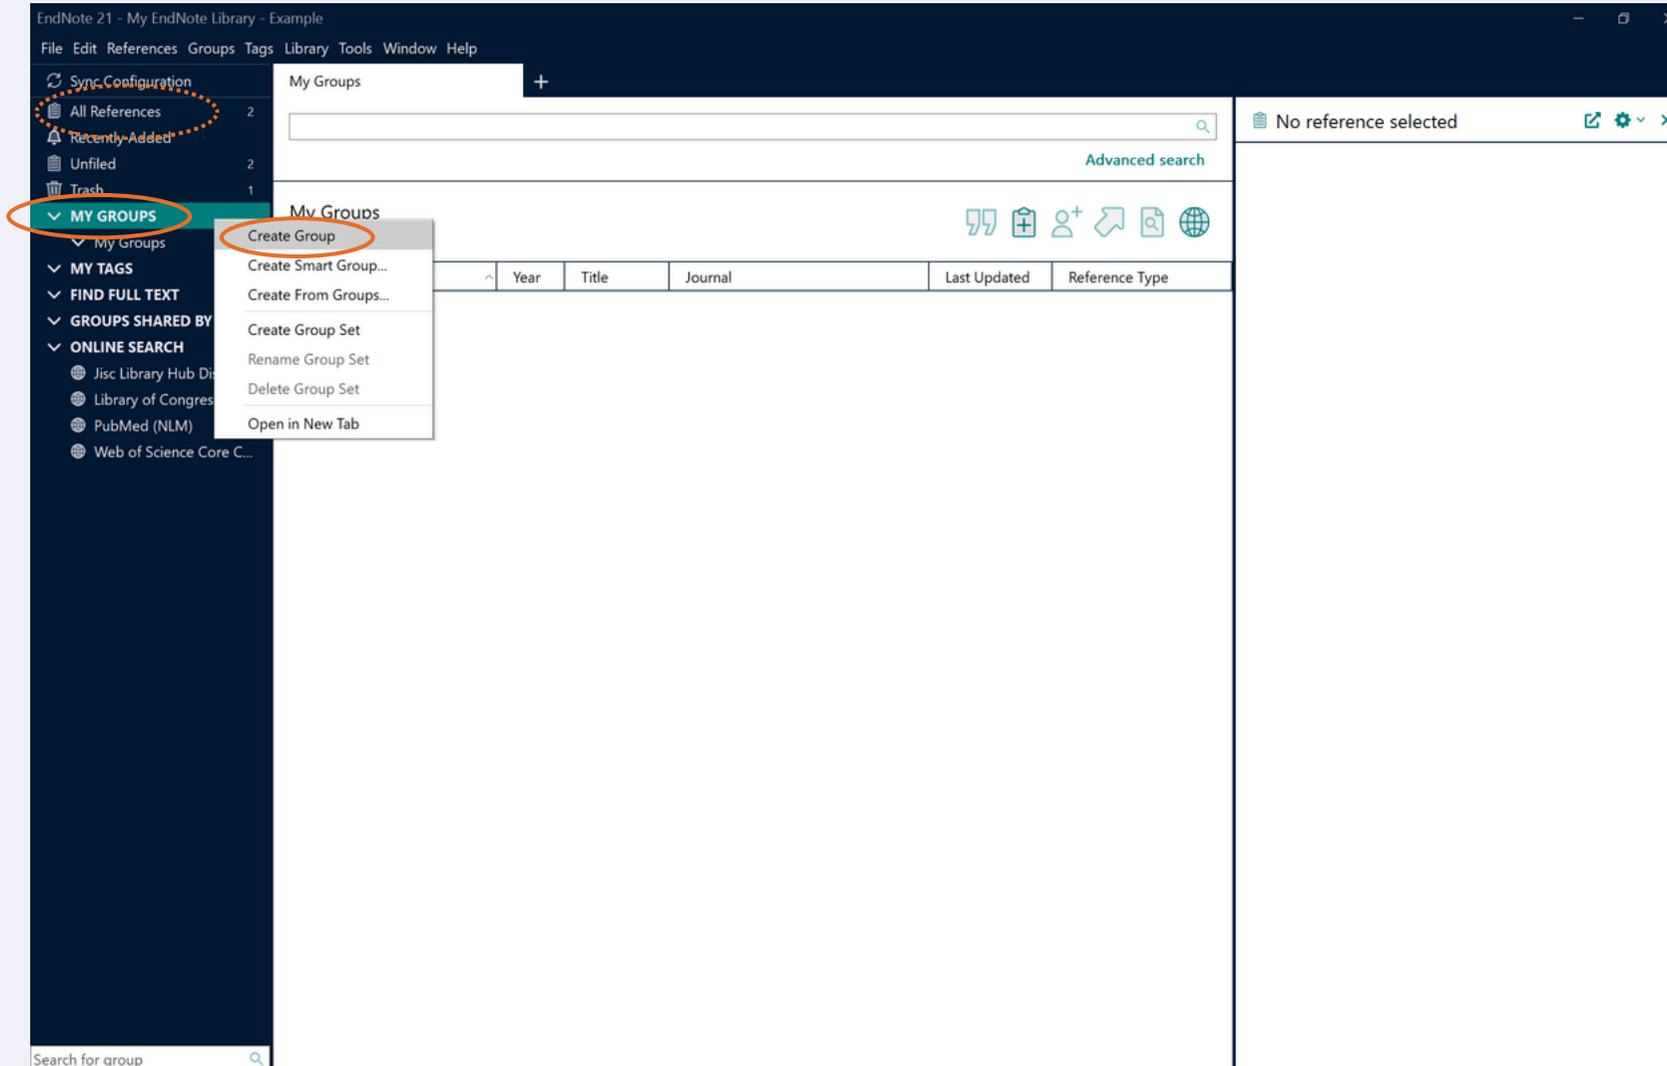

*Once saved, open the “Style Manager” (as shown earlier) and find the style you previously saved and tick the box next to it. Once ticked, exit the Styles window. You can now go into “Output Styles” and tick your newly added reference style.

CREATING GROUPS OF REFERENCES

The references you transfer/download to your EndNote Library will appear in the “All References” tab. However, if you want to organise your references by a topic or assignment etc., you can use the “My Groups” tab. Right-click on “My Groups” to create a group. You can also create a “Smart Group” which creates groups for you based on a criteria subset you choose, for example, authors, publication dates, titles etc.

The name of the group that was created can be changed at any time by double clicking on said group name. References can be dragged to and from groups at any time.

The screenshot shows the EndNote 21 interface. On the left sidebar, under 'MY GROUPS', the group 'dogs are better' is highlighted with a red circle. The main window displays a search result for 'dogs are better' with a table of references. The right sidebar shows the details of a selected reference.

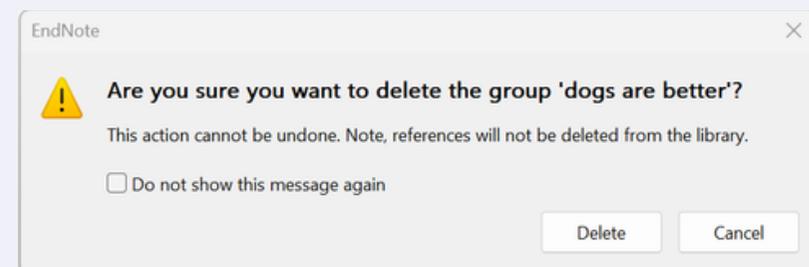

Author	Year	Title	Journal	Last Updated	Reference Type
González-Ramírez, M. ...	2021	Pet-Human ...	Animals (Basel)	11/07/2024	Journal Article

The right sidebar shows the details of a selected reference:

Pet-Human Relationships: Dogs versus Cats
 M. T. González-Ramírez and R. Landero-Hernández
 Animals (Basel) 2021 Vol. 11 Issue 9
 Accession Number: 34573712 PMID: PMC8470704 DOI: 10.3390/ani11092745

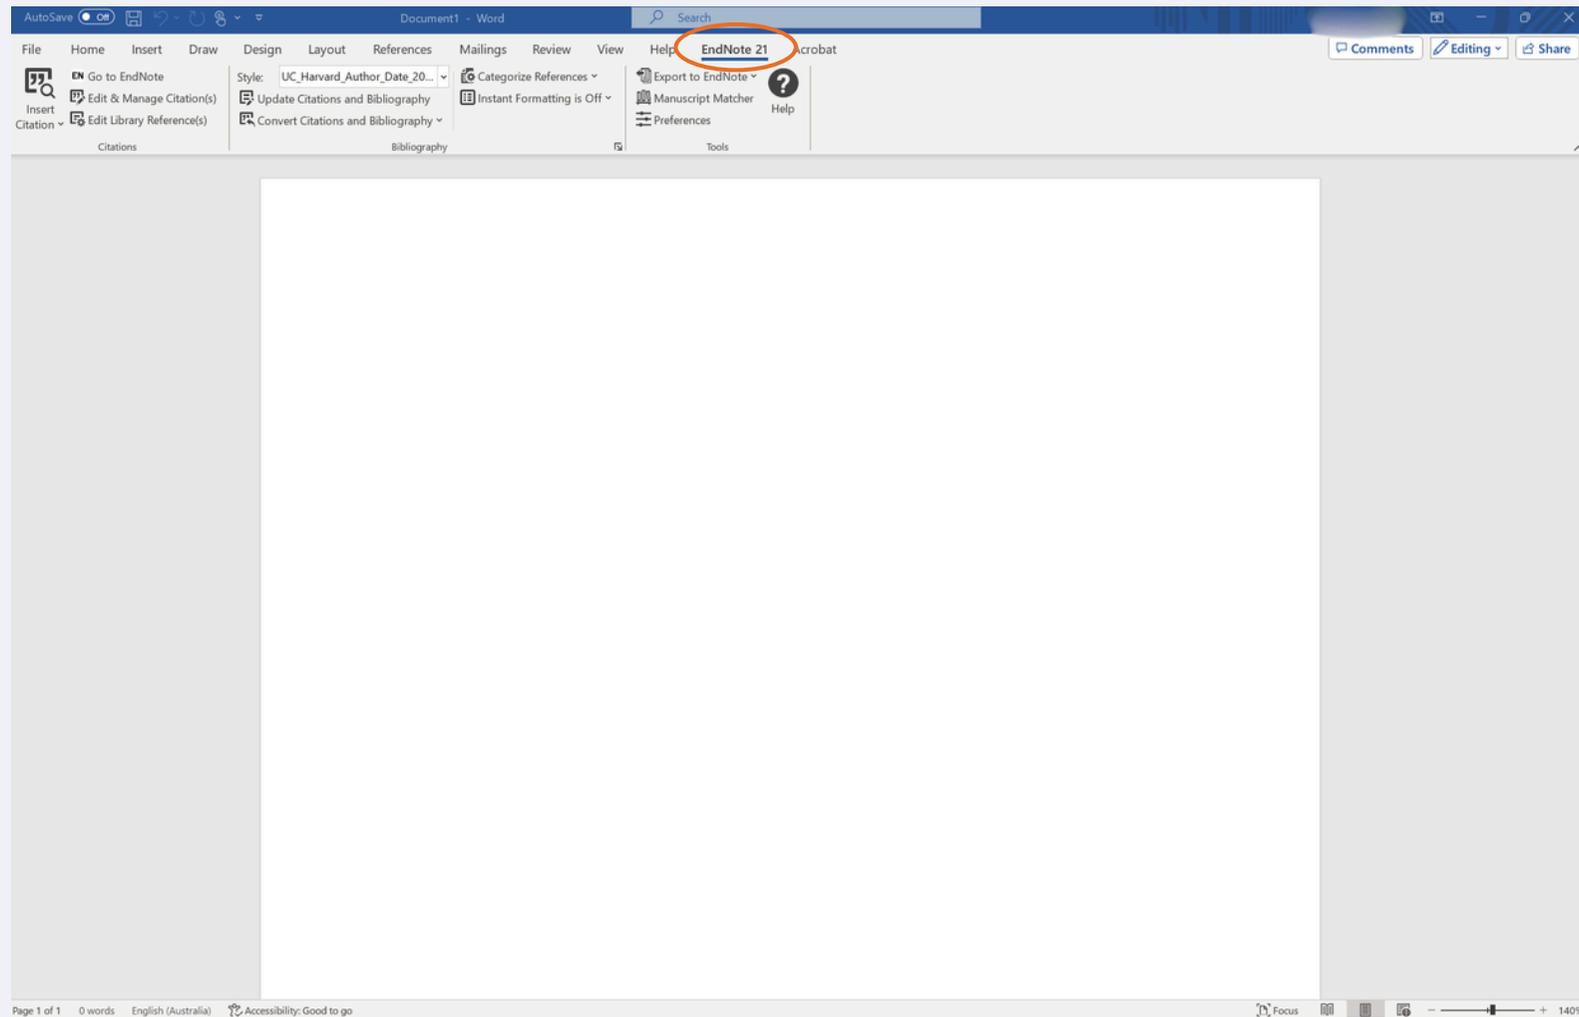

The study of human-animal interactions has increased, focusing on the dog-owner relationship, leaving a lag in research on the cat-owner relationship and practically a total absence of studies that compare the dog-owner relationship with the cat-owner relationship. Therefore, the objective of the present study was to make this comparison based on the perception of people living with both dogs and cats, considering interaction, emotional closeness, and perceived cost of the relationship. A total of 132 residents in Mexico participated. To evaluate the pet-human relationship, the dog and cat versions of the Monash dog owner relationship scale were used, thus obtaining comparable scores for the relationship with dogs and cats. Based on what the owners reported, significant differences were found. Relationships with cats were better than relationships with dogs, a finding that was confirmed when comparing male dogs and cats and when comparing female dogs and cats. It was concluded that relationships with cats are better because the perceived cost of such a relationship is lower. However, emotional closeness is greater with dogs than with cats.

If you want to delete a group, the following message should come up. The references should not be deleted.

CITE WHILE YOU WRITE (CWYW) – MICROSOFT WORD

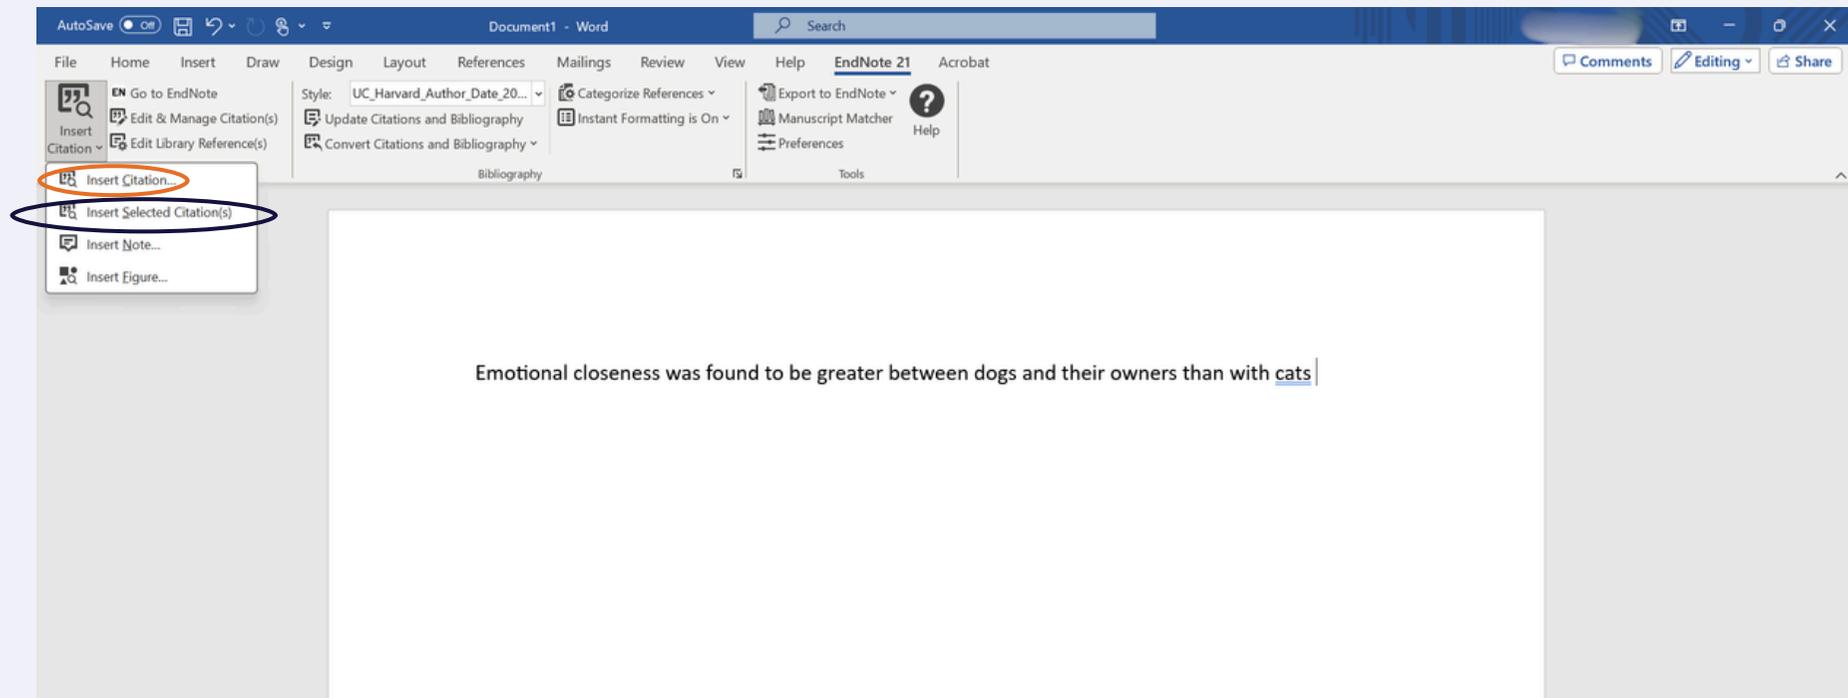

Cite While You Write (CWYW) is a feature in EndNote that integrates with Microsoft Word to help you add and format citations and bibliographies as you work on your document. When you install EndNote, it should automatically add the "Cite While You Write" plugin to Microsoft Word, often seen as the "EndNote 21" tab. If the plugin is not showing up, try restarting your device and then check again.

To use the CWYW feature, the EndNote application needs to remain open on your computer. There are a few ways in which you can add references to your writing in Word.

1 EndNote 21 → Insert Citation → Insert Citation...

2 EndNote 21 → Insert Citation → Insert Selected Citation(s)...

- 1 The “EndNote Find & Insert My References” box will appear when “Insert Citation...” is clicked. Use the search bar to find the reference, usually by year or author, and click on said reference. If you want to insert the **normal format (author and date)**, click insert. If you only want the **Authors’ name or the year** it was published, choose that option in the dropdown list.

Emotional closeness was found to be greater between dogs and their owners than with cats

Library: My EndNote Library - Example.enl

Page 1 of 1 15 words English (Australia) Accessibility: Good to go Focus 140%

The citation will be inserted at the location of your cursor when you select the reference. The full reference will be added to the end of the document, forming the bibliography list. The CWYW feature ensures that all references cited in the document are included in the bibliography, usually in alphabetical order.

Note: If you cite the same reference multiple times within the document, it will appear only once in the bibliography list.

- 2 The other method to insert a citation requires more interaction with the EndNote application. Firstly, go to the EndNote application, and select the reference you want to add to your document by clicking on it.

The screenshot displays the EndNote 21 application window. The main pane shows a list of references under the heading 'All References'. A mouse cursor is clicking on the second reference in the list, which is highlighted in green. The right-hand pane shows the details for this selected reference, including the title, authors, journal information, and a preview of the article's abstract.

Author	Year	Title	Journal	Last Updated	Reference Type

In the process of domestication, dogs (Canis familiaris) and cats (Felis catus L.) have undergone thousands of years of genetic changes that have adapted them to the human environment. Both species have acquired a global distribution and it has become quite common to find homes with the two living side by side. Nevertheless, there is widespread belief that

ENDNOTE WEB

EndNote Web link: <http://myendnoteweb.com/>

EndNote online is a cloud-based reference management tool that complements the EndNote desktop app. It allows you to sync between the online version and the desktop app, share libraries and organise references. It is best to use this option if you are using another device that doesn't have your EndNote desktop app installed, or if you are working collaboratively.

To get started, create an account with EndNote Web. Once you have registered and logged in, this is what the home page will look like:

The screenshot shows the EndNote Web home page. At the top left is the Clarivate | EndNote logo. Below it is a navigation bar with links: My References, Collect, Organize, Format, Match, Options, and Downloads. The main content area is divided into three columns under the heading "Getting Started".

Left Column (Quick Search): A sidebar with a "Quick Search" box containing a search input field and a dropdown menu set to "All My References". Below this is a "My References" section with sub-sections: "All My References (3)" (including [Unfiled] (0) and Quick List (0)), "Trash (0)", and "My Groups" (including Bronte group 1 (3)).

Middle Column (Find): A section titled "Find" with a magnifying glass icon. It describes "Collect" references by searching online databases or importing existing collections. It lists actions: "Search an online database", "Create a reference manually", "Import references", and "NEW! Find your best potential journal".

Right Column (Store & Share): A section titled "Store & Share" with an icon of two people. It describes "Organize" and group references and share them with colleagues. It lists actions: "Create a new group", "Share a group", and "Find duplicate references".

Far Right Column (Create): A section titled "Create" with a document icon. It describes using a plugin to "format" bibliographies and cite references while writing. It lists actions: "Cite While You Write™ Plug-In", "Create a formatted bibliography", and "Format a paper".

Syncing Your EndNote Web with Your EndNote Desktop

To sync between your libraries, first, you navigate to “Library” in the EndNote desktop app. Then you click on “Sync”, which will open a secondary log-in box. Enter your credentials that you used to create your EndNote Web. Accept the user registration agreements, and then click on “Sync”.

The screenshot shows the EndNote 21 desktop application interface. The 'Library' menu is open, and the 'Sync' option is highlighted. The 'EndNote Registration' dialog box is open, showing the 'Sync' button circled in orange. The 'EndNote Login' dialog box is also open, showing the 'Sync' button circled in orange. An arrow points from the 'Sync' button in the 'EndNote Registration' dialog box to the 'EndNote Login' dialog box. Another arrow points from the 'Sync' button in the 'Library' menu to the 'EndNote Login' dialog box.

EndNote Registration

EndNote registration is complete.

Sync Cancel

EndNote Login

Using an EndNote account makes it easy to get the latest features and keep your library in sync. [Learn more](#)

Create a new EndNote Account

If you don't have an EndNote account or aren't sure, then click Sign Up.

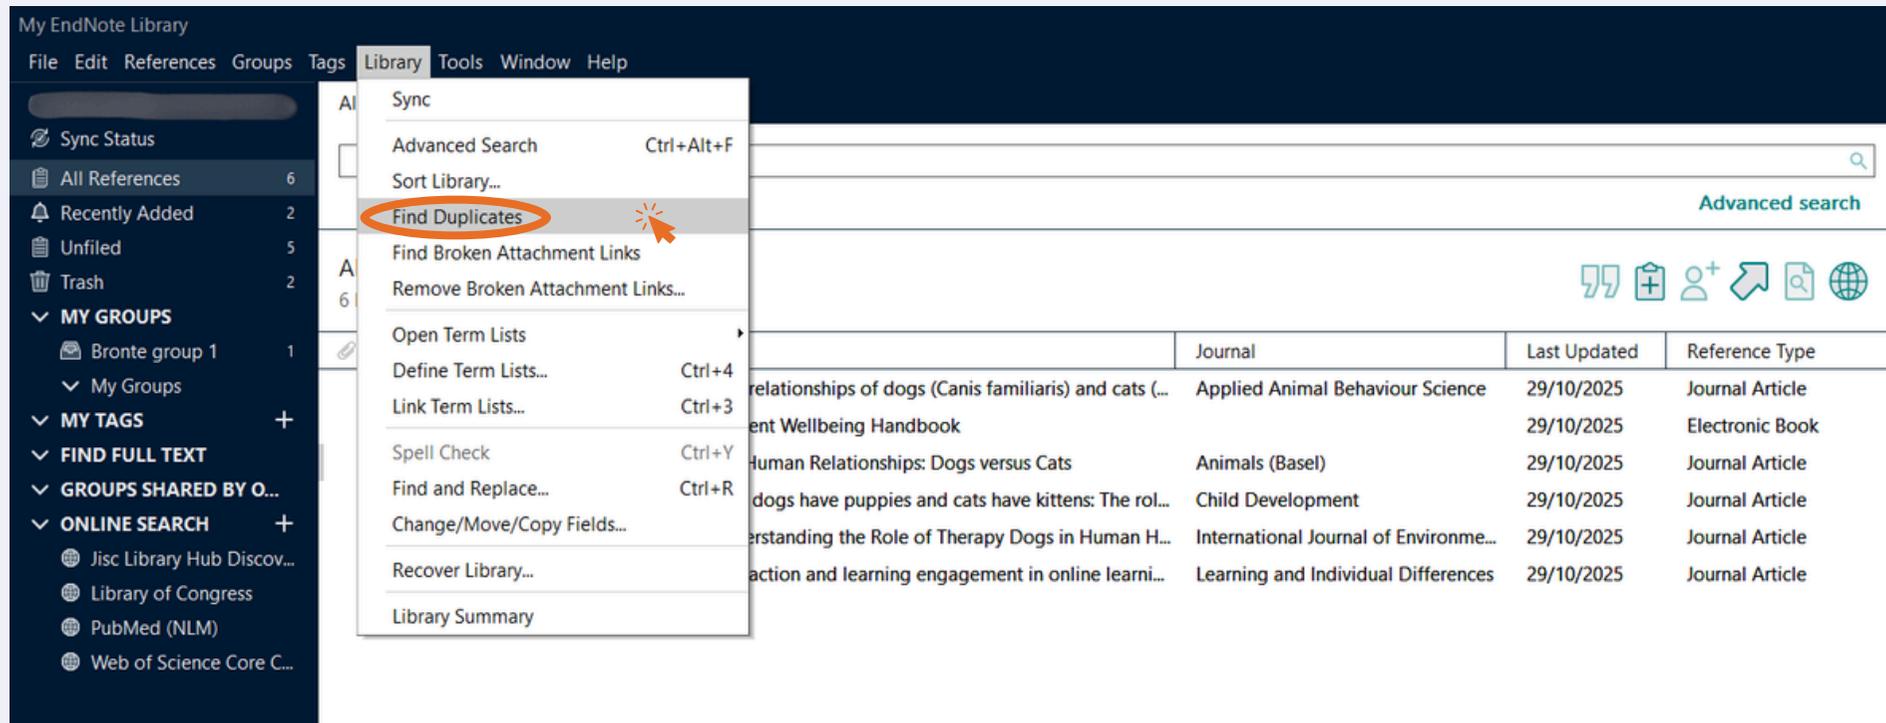

EndNote Account Credentials

E-mail Address:

Password:

[Forgot Password](#)

When the 2 libraries have synced and you have the same reference in both libraries, the reference may duplicate in your desktop app. To fix this, click on “Library” and then “Find Duplicates”. This will create a pop-up box for you to look at any duplicates that may be present, so you can organise them accordingly.

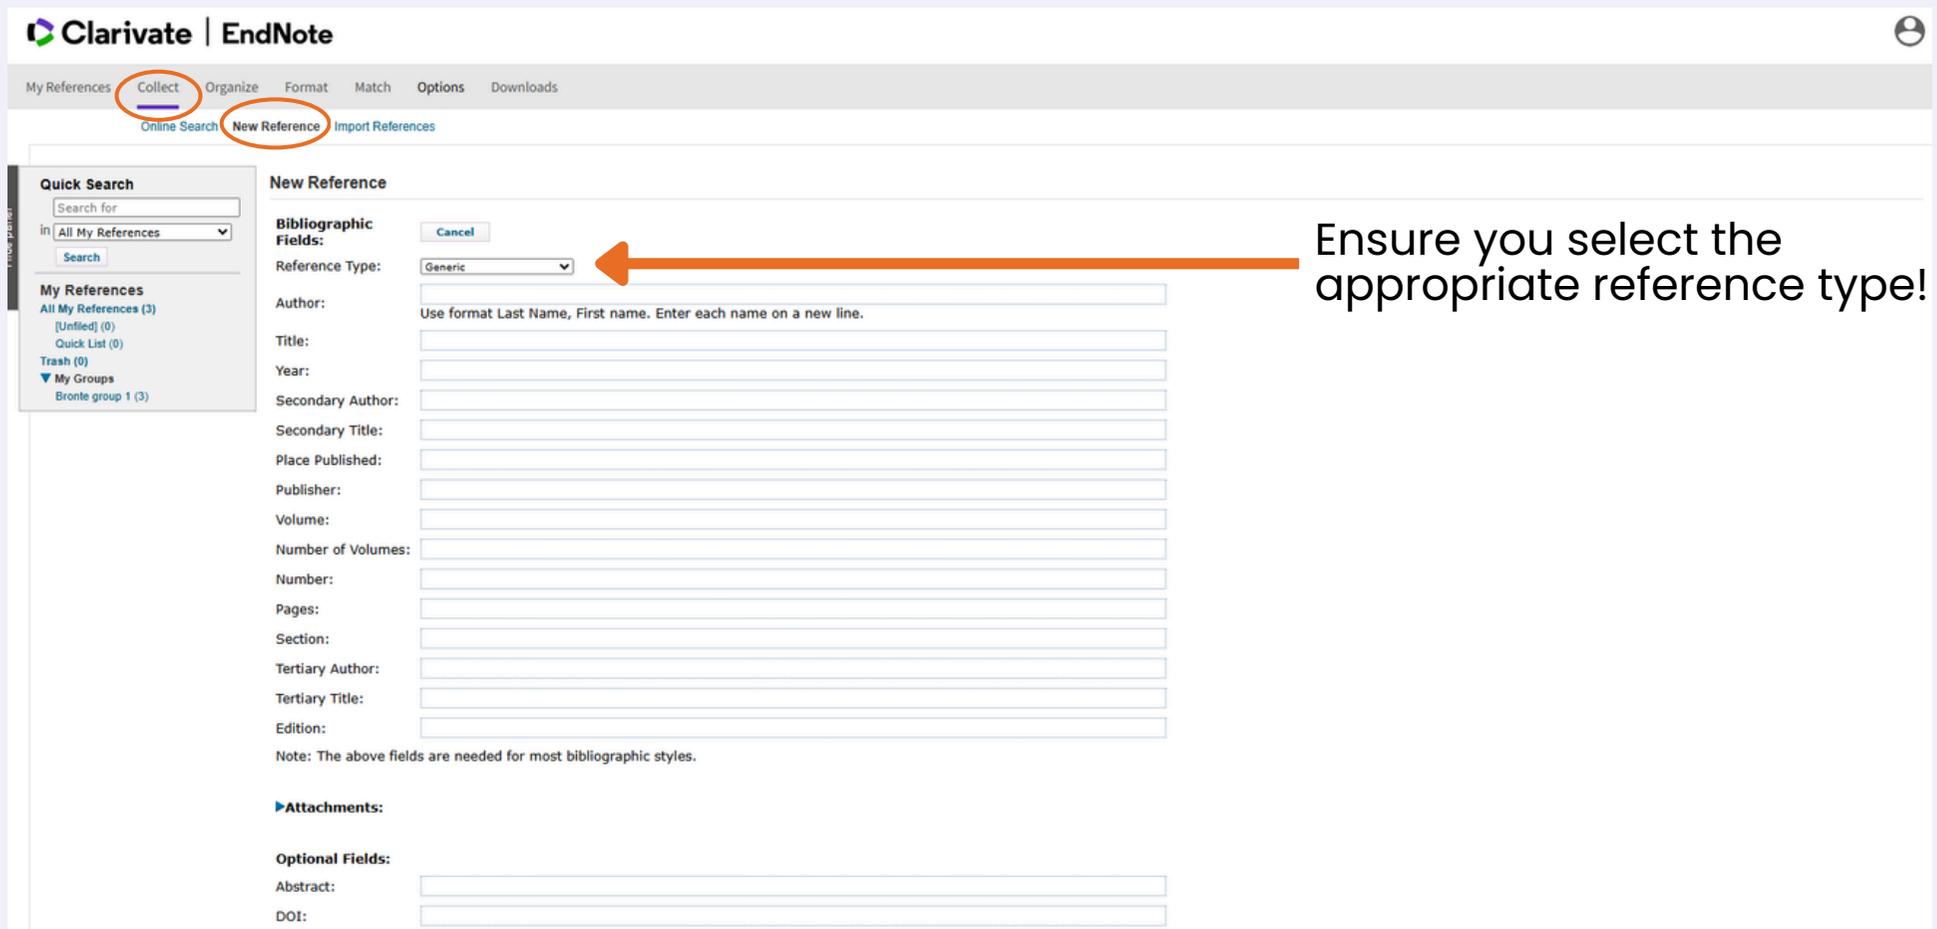

When using the 2 different EndNote variants, ensure you are regularly syncing the libraries. To do this, navigate to “Sync Status” above “All References” in the side menu. Then click “Sync Now”.

Adding References to EndNote Web

There are a few methods to add a reference to EndNote Web.

If you need to add a **brand new reference** and need to do it **manually**, your first step is to click on “Collect” in the main top bar menu. Then click on “New Reference” – this will open up the menu below where you can choose your reference type, and fill out the necessary information.

The screenshot displays the EndNote Web interface. At the top, the navigation bar includes 'My References', 'Collect', 'Organize', 'Format', 'Match', 'Options', and 'Downloads'. Below this, a secondary bar contains 'Online Search', 'New Reference', and 'Import References'. The 'Collect' and 'New Reference' buttons are circled in orange. On the left, a 'Quick Search' sidebar is visible. The main area is titled 'New Reference' and contains a 'Bibliographic Fields' section with a 'Cancel' button and a 'Reference Type' dropdown menu set to 'Generic'. An orange arrow points to this dropdown menu. Below the dropdown are various input fields for author, title, year, etc. A note at the bottom of the fields states: 'Note: The above fields are needed for most bibliographic styles.' To the right of the form, a text box reads: 'Ensure you select the appropriate reference type!'.

To add a reference that you have downloaded the file for (e.g., RIS File), select “Import Reference” under the menu option “Collect”. Ensure the “Import Option” is set on “EndNote Import”. Then, click on “Choose File” and locate the correct file in your computer's downloads folder, and then add it. The “To” section determines where in EndNote Web you want the reference located. If you don't want it in a specific group, select “Unfiled”. To find your references, navigate to the main top menu bar, and select “My References”.

The image illustrates the process of importing a reference into EndNote. It consists of three main parts:

- Top Left:** A screenshot of the EndNote web interface. The "Collect" menu is circled in orange, and the "Import References" option is also circled in orange. Below, the "Import References" form is shown with "EndNote Import" selected for the "Import Option" and "Unfiled" selected for the "To:" dropdown. An orange arrow points from the "EndNote Import" dropdown to the file explorer window.
- Top Right:** A screenshot of a Windows file explorer window showing the "Downloads" folder. A file named "citation-354722780.ris" is selected. A blue arrow points from the file to the "To:" dropdown in the import form.
- Bottom:** A screenshot of the EndNote web interface showing the "My References" page. The "All My References (4)" link is circled in orange. The main content area shows a list of references, including "Feuerstein, N." from 2008.

Checking for Missed Citations/References

EndNote Web has a cool feature in which you can check your document to see if you have any unmatched or ambiguous citations. This is unlikely to happen if you are using the CWYW function, but it is always good to check! For more information on how this works, click [here](#).

Navigate to the “Format” option in the menu, and then “Format Paper”. To see how this function works, it is suggested to download the sample paper and enter it, which is what was done in this example.

The image displays two screenshots of the EndNote web interface. The top screenshot shows the 'Format Paper' page with the 'Format' and 'Format Paper' menu items circled in orange. The bottom screenshot shows the results of the 'Format Paper' function, indicating 8 unmatched citations.

Format Paper

For Rich Text Format documents (.rtf) (See a sample paper):

File: Paleo.rtf

Bibliographic style: [Select Favorites](#)

ignore unmatched citations

[Show format paper preferences](#)

Format Paper

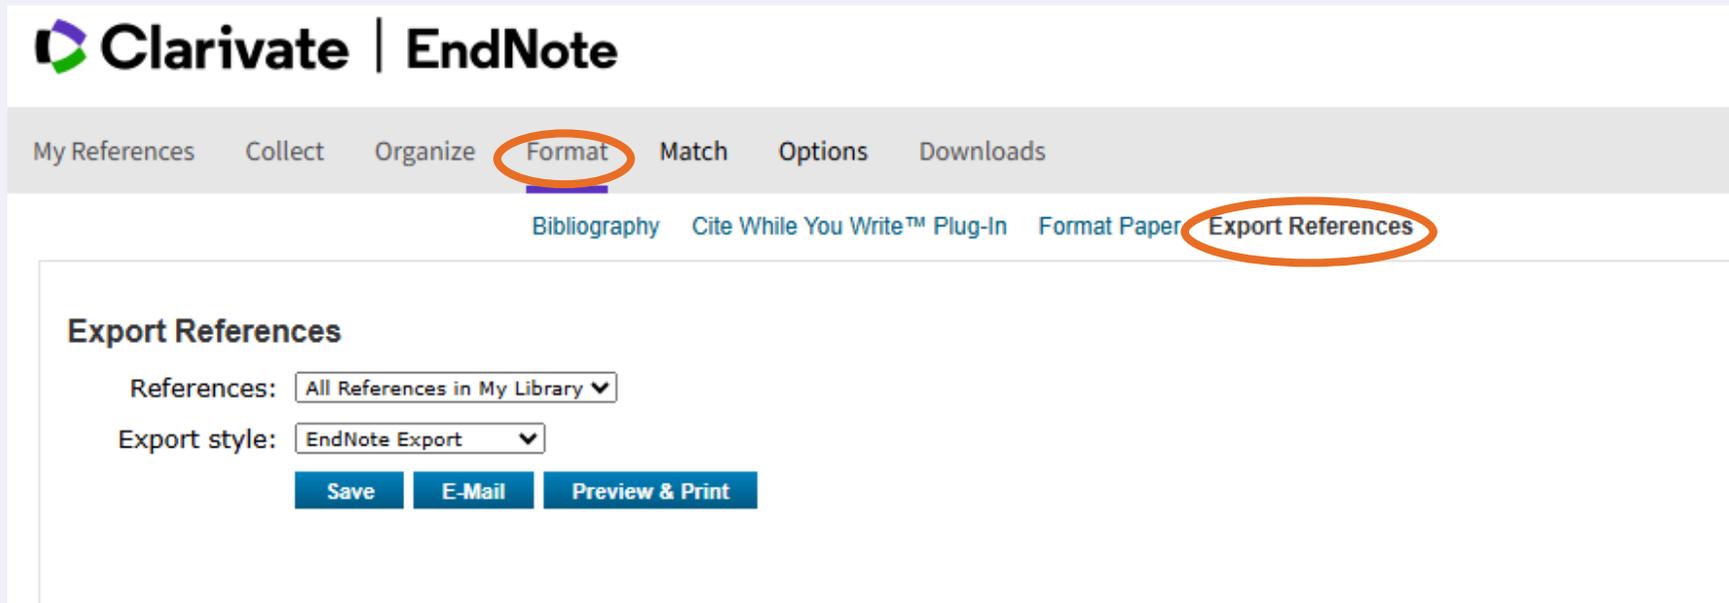

No matched citations were found in the document. A document must contain matched citations in order to create a formatted bibliography.

Exporting References from EndNote Web to EndNote App

If syncing EndNote libraries is not an option, the references in EndNote Web can be exported. To do this, navigate to “Format” and then “Export References”. Choose which references you would like to export, and select “EndNote Export” as the export style. You can either save this file or email it – this is up to you!

The screenshot shows the EndNote Web interface. The top navigation bar includes 'My References', 'Collect', 'Organize', 'Format', 'Match', 'Options', and 'Downloads'. The 'Format' menu is open, showing options: 'Bibliography', 'Cite While You Write™ Plug-In', 'Format Paper', and 'Export References'. The 'Export References' option is selected. Below the navigation bar, the 'Export References' section is visible. It includes a dropdown menu for 'References:' set to 'All References in My Library', and another dropdown menu for 'Export style:' set to 'EndNote Export'. At the bottom of this section are three buttons: 'Save', 'E-Mail', and 'Preview & Print'.

Note: Exporting the references from EndNote Web saves the files in text format (txt). Txt files can be imported into EndNote desktop by navigating to “File” then “Import” and then selecting the “File” option. Adjust the import settings for your needs:

The screenshot shows the 'Import File' dialog box in EndNote desktop. It has a title bar with a question mark and a close button. The dialog contains the following fields and options:

- Import File:** A text input field with a 'Choose...' button next to it.
- Import Option:** A dropdown menu set to 'EndNote Import'.
- Duplicates:** A dropdown menu set to 'Discard Duplicates'.
- Text Translation:** A dropdown menu set to 'No Translation'.

At the bottom of the dialog are two buttons: 'Import' and 'Cancel'.

Exporting the Bibliography (Reference List)

EndNote Web allows users to create a reference list from the references in their online library. To do this, select “Format” and then “Bibliography”. Ensure you enter the correct settings in terms of which references you want, the style (e.g., APA 7) and the file format – it is recommended to use the RTP (rich text file) so nothing is missed. You can then download or email this file. Please check with your university referencing guide that there are no discrepancies.

The screenshot displays the EndNote Web interface. The top navigation bar includes 'My References', 'Collect', 'Organize', 'Format', 'Match', 'Options', and 'Downloads'. The 'Format' menu is open, showing 'Bibliography' as the selected option. Below the navigation, the 'Bibliography' settings are visible: 'References' is set to 'All References in My Library', 'Bibliographic style' is 'APA 7th', and 'File format' is 'RTF (rich text file)'. There are 'Save', 'E-Mail', and 'Preview & Print' buttons. To the right, a browser window shows the 'Preview & Print' page with a list of references:

ENDNOTE CLICK

EndNote Click is an internet browser plugin that allows users to easily and quickly access PDFs for the sources they are researching.

How does it work?

Subscription and Open Access combined

EndNote Click harnesses your library subscriptions to get you the highest quality PDFs. When your subscriptions do not grant you access, EndNote Click will search for an open access alternative from its vast database of Open Access articles.

One-click access to PDFs on article pages

When you visit an article page on any academic website, EndNote Click searches for full text PDFs and gives you one-click access via a button that is in a consistent, convenient place.

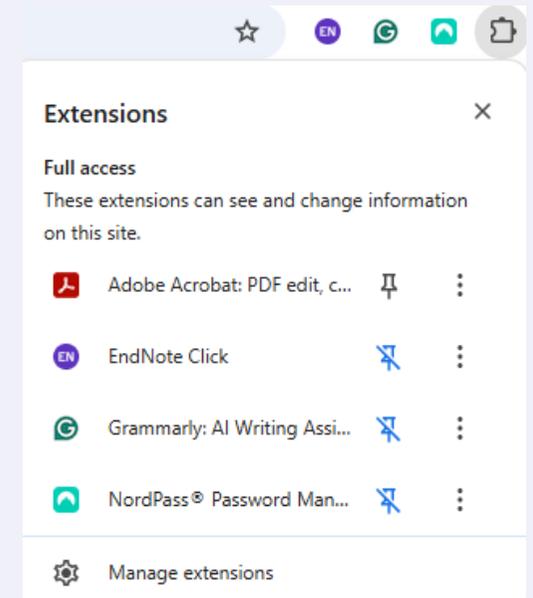

One-click access to PDFs from search pages

When using various academic search engines such as Web of Science and PubMed, EndNote Click searches for full text PDFs and gives you one-click access.

You will need to create an account to use EndNote Click, which you can then access on other devices if needed. This plugin also allows you to save PDFs that are located in your “Locker” so you can access them at any time. EndNote Click will not locate PDFs for every source, as access is contingent on the availability of said source.

Example

Once you begin researching for sources, especially journal articles, the EndNote Click pop-up will appear on the left hand bottom of your screen. Hover your mouse over the “View PDF” to see the availability options. To open the PDF, simply click on the purple pop-up.

The screenshot shows the MDPI Animals journal article page for the article "Pet-Human Relationships: Dogs versus Cats" by Mónica Teresa González-Ramírez and René Landero-Hernández. The page includes a search bar, navigation links, and a sidebar with options like "Submit to this Journal" and "Review for this Journal". The article details include the journal name, volume, issue, and DOI. The article is marked as "Open Access" and "Article". The authors' affiliation is the School of Psychology, Facultad de Psicología, Autonomous University of Nuevo León, Mexico. The article was submitted on 9 August 2021, revised on 5 September 2021, accepted on 8 September 2021, and published on 20 September 2021. The article belongs to the Section Human-Animal Interactions, Animal Behaviour and Emotion. The article has 19812 views and 34 citations. A purple EndNote Click pop-up is visible in the bottom left corner, showing the "View PDF" button and a list of availability options: "In Your Locker", "Publisher PDF Found", and "Open Access".

Simple Summary

Human-animal interactions have been the focus of research in recent decades, with the primary interest being the dog-owner relationship. The cat-owner relationship has not been as well studied, nor has the comparison between the two types of relationships. To compare these relationships, 132 people residing in Mexico who lived with both dogs and cats were evaluated. The results of the study indicate that the perceived relationship that an individual has with cats is better than that with dogs because the perceived cost of the relationship is greater with dogs and the interaction is greater with cats. However, the emotional closeness that occurs in the relationship is greater with dogs.

This will then open up your EndNote Click “Locker”, where you can access the PDF, download it, retrieve the citation and much more.

The screenshot displays the 'My Locker' interface in a web browser. On the left, a sidebar contains several options: 'Download PDF' (circled in orange), 'Share PDF', 'Export to EndNote Desktop', 'Push to EndNote Web', 'Visit journal page', 'Get citation' (circled in orange), 'Manage tags', and 'Web of Science record'. An orange arrow points from the 'Get citation' option to a 'Get citation' dialog box at the bottom left. The dialog box has a 'close' button and a 'Citation style' dropdown menu set to 'American Psychological Association 7th edition'. Below the dropdown, the citation text is displayed: 'González-Ramírez, M. T., & Landero-Hernández, R. (2021). Pet-Human Relationships: Dogs versus Cats. *Animals*, 11(9), 2745. <https://doi.org/10.3390/ani11092745>'. A 'Copy to clipboard' button is located at the bottom right of the dialog box. The main content area shows the article 'Pet-Human Relationships: Dogs versus Cats' by Mónica Teresa González-Ramírez and René Landero-Hernández, published in the journal *Animals*. The article includes a 'Simple Summary' and an 'Abstract'.

Simple Summary: Human-animal interactions have been the focus of research in recent decades, with the primary interest being the dog-owner relationship. The cat-owner relationship has not been as well studied, nor has the comparison between the two types of relationships. To compare these relationships, 132 people residing in Mexico who lived with both dogs and cats were evaluated. The results of the study indicate that the perceived relationship that an individual has with cats is better than that with dogs because the perceived cost of the relationship is greater with dogs and the interaction is greater with cats. However, the emotional closeness that occurs in the relationship is greater with dogs.

Abstract: The study of human-animal interactions has increased, focusing on the dog-owner relationship, leaving a lag in research on the cat-owner relationship and practically a total absence of studies that compare the dog-owner relationship with the cat-owner relationship. Therefore, the objective of the present study was to make this comparison based on the perception of people living with both dogs and cats, considering interaction, emotional closeness, and perceived cost of the relationship. A total of 132 residents in Mexico participated. To evaluate the pet-human relationship, the dog and cat versions of the Monash dog owner relationship scale were used, thus obtaining comparable scores for the relationship with dogs and cats. Based on what the owners reported, significant differences were found. Relationships with cats were better than relationships with dogs.
