A GUIDE TO **ENDNOTE**

Developed by CUC Snowy Monaro

PURPOSE OF DOCUMENT

This guide is designed to help students download, set up and navigate the referencing software EndNote.

CONTENTS

Downloading EndNote	1
Using EndNote	3
Adjusting the Referencing Style	8
Creating Groups of Referencing	14
Cite While You Write (CWYW)	16
EndNote Web	23
○ Syncing your EndNote libraries ○ Adding references ○ Checking for missed citations/references ○ Exporting references from EndNote Web ○ Exporting the reference list	
EndNote Click	31

DOWNLOADING THE ENDNOTE APPLICATION

- 1 Download the newest EndNote application (21) through your university's library resources. Try googling "EndNote download [university]".
- 2 Once you've downloaded EndNote, launch the application and proceed with the setup instructions provided.
- 3 When setting up EndNote, a prompt will come up regarding your EndNote library. Select the "Create a new library" option.

- 4 Chose a location in your computer files to save your EndNote library to. Saving in the "Documents" folder is recommended on the local drive. Do not save in cloud-synced folders like OneDrive or Google Drive – this could result in file corruption. Ensure a suitable "File name" is chosen and the "Save as type" is EndNote Library (*.enl).

- 5 Your EndNote library will now open, looking like the image below. It is recommended that you only have one EndNote library to simplify your file management, ensure successful syncing between devices/EndNote Online and avoid citation errors. You will be able to organise your references once in EndNote (see page 14 of this guide).

USING ENDNOTE

6

There are multiple methods to export a source/citation for referencing in your assignment. One common approach is depicted in the image below. Click on the "Cite" button of the desired source and choose to export it as an "EndNote" file when prompted. RIS (.ris), BibTeX (.bib), PubMed (.nbib) or EndNote Export (.enw) files can be used if the specific "EndNote" file type is unavailable.

The screenshot shows a Google Scholar search for "why dogs are better than cats". The results list several articles. The third article, "Pet-human relationships: Dogs versus cats" by MT González-Ramírez and R Landero-Hernández, is highlighted. The "Cite" button for this article is circled in orange. A modal window titled "Cite" is open, showing various citation styles (MLA, APA, Chicago, Harvard, Vancouver) and their corresponding formatted citations. At the bottom of this modal, the "EndNote" option is circled in orange, with an orange arrow pointing from the "Cite" button in the search results to it.

BibTeX **EndNote** RefMan RefWorks

- 7 To import the downloaded reference into the EndNote application, navigate to your computer's "Downloads" folder. Locate and click on the most recent "EndNote Import File" (which might appear as "RIS Formatted File" if downloaded in RIS format or "NBIB Formatted File"). The reference should then appear in your EndNote Library. You can also click on the file when it appears in your downloads while in Google.

"HOW TO" VIDEO

- 8 Clicking on the reference in EndNote will expand the side panel to display additional information (**Summary**). Here, you can modify the reference details (**Edit**) and attach a PDF version of the source (**PDF**) to keep it linked with the reference in EndNote.

The screenshot shows the EndNote 21 interface. On the left is a dark sidebar with navigation options like 'Sync Configuration', 'All References', 'Imported References', 'Recently Added', 'Unfiled', 'Trash', 'MY GROUPS', 'MY TAGS', 'FIND FULL TEXT', 'GROUPS SHARED BY O...', and 'ONLINE SEARCH'. The main area is titled 'Imported References' and contains a table with one reference. An orange arrow points to the 'Journal Article' entry in the 'Reference Type' column. On the right, the side panel is expanded, showing the 'Summary' tab for the selected reference. The summary includes the title 'Pet-human relationships: Dogs versus cats', authors 'M. T. González-Ramírez and R. Landero-Hernández', and publication details 'Animals 2021 Vol. 11 Issue 9 Pages 2745'. At the top of the side panel, a toolbar contains icons for 'Summary', 'Edit', 'PDF', and other actions, with the 'Summary' tab highlighted by an orange circle.

9 Adding or linking your source to your EndNote reference can be very helpful. To do this, you can download the source to your computer and attach it to your EndNote reference using the “+ Attach File” button.

Alternatively, you can right-click on the reference* and select “Find Full Text.” EndNote will try to locate the source online and connect it to the reference. You can follow its progress under the “FIND FULL TEXT” section in the sidebar. Please note that EndNote may not always succeed in finding the source, so you might need to manually attach the file as described above.

Once attached, the source saves as a PDF and can be found in the “PDF” section of the reference.

*Please note that typically only journal articles will be able to be connected to your reference by the “Find Full Text” function.

The screenshot displays the EndNote application window. On the left sidebar, the 'FIND FULL TEXT' option under 'MY TAGS' is circled in red. In the main pane, a table of references is shown. A right-click context menu is open over the second reference, with 'Find Full Text' circled in red. On the right pane, the 'Attach file' button is circled in red. The reference details for 'González-Ramírez MT and Landero-Hernández R (2021) 'Pet-Human Relationships: Dogs versus Cats', *Animals (Basel)*, 11(9), doi:10.3390/ani11092745' are visible.

Pet-Human Relationships: Dogs versus Cats

M. T. González-Ramírez and R. Landero-Hernández

Animals (Basel) 2021 Vol. 11 Issue 9

Accession Number: 34573712 PMCID: PMC8470704 DOI: 10.3390/ani11092745

https://mdpi-res.com/d_attachment/animals/animals-11-02745/article_deploy/animals-11-02745-v2.pdf?version=1632282420

The study of human-animal interactions has increased, focusing on the dog-owner relationship, leaving a lag in research on the cat-owner relationship and practically a total absence of studies that compare the dog-owner relationship with the cat-owner relationship. Therefore, the objective of the present study was to make this comparison based on the perception of people

10

Remember to regularly save your EndNote library by selecting “File” from the top menu and then clicking “Save.” It’s also a good idea to periodically save copies of your EndNote library for extra security, replacing the file to ensure there is not a buildup of copies. To do this, go to “File” in the top menu and choose “Save a Copy...” and follow the prompts to save over an existing backup copy.

ADJUSTING THE REFERENCING STYLE

To adjust the referencing format or style (e.g., APA 7 or Harvard), select the **"Tools"** option from the top menu, then click on **"Output Styles"**. From there, you can choose the specific referencing style you need. Many universities have their own preferred styles for citations and referencing, so it's advisable to consult your library to ensure you are following the correct guidelines.

*Note: You may need to download and add your university's specific referencing style to the EndNote application if it's not already available.

To add a referencing style to your EndNote that is not seen in the short list, click on **"Tools"**, then **"Output Styles"** and finally **"Open Style Manager..."**.

The “Style Manager” looks like the image below. Here, you can find other referencing types. Tick the small box next to the reference to add it to your “Output Styles” in EndNote.

*To download an EndNote reference style, check with your university library resources. Alternatively, Google search “EndNote download [university]”. For example, UC has an “**EndNote Styles**” section on their EndNote information page. The 2021 Harvard Style will be downloaded for this example.

EndNote Styles

These are EndNote Styles written for staff and students of the University of Canberra. These styles should be used in conjunction with the UC Referencing Guide.

-  [UC APA 7th ed](#)
This style is created by the University of Canberra.
-  [UC Harvard 2021 Style](#)
This style is created by the University of Canberra and is based on the online edition (2021) of the Australian Government Style Manual.
-  [UC Chicago 17th Author Date](#)
This style is created by the University of Canberra.
-  [UC Chicago 17th Footnote Style](#)
This style is created by the University of Canberra.
-  [UC Vancouver Numeric](#)
This style is created by the University of Canberra. This style uses abbreviated journal titles. See - <http://canberra.libanswers.com/a.php?qid=513602>
-  [UC Vancouver Superscript](#)
This style is created by the University of Canberra. This style uses abbreviated journal titles see- <http://canberra.libanswers.com/a.php?qid=513602>
-  [UC AGLC 3rd ed](#)
-  [Using EndNote with AGLC3](#)

If you are using the IEEE Referencing Style you can download the EndNote IEEE style below.

-  [IEEE Referencing Style](#)

*Once downloaded, the EndNote Style will appear in the "Downloads" folder of your computer.

1. Click on the **download** to open the EndNote style.
2. Then click on "File" in the top menu.
3. Click "Save As" and save the EndNote style (remember the name in which you saved the style).

*Once saved, open the “Style Manager” (as shown earlier) and find the style you previously saved and tick the box next to it. Once ticked, exit the Styles window. You can now go into “Output Styles” and tick your newly added reference style.

CREATING GROUPS OF REFERENCES

The references you transfer/download to your EndNote Library will appear in the “All References” tab. However, if you want to organise your references by a topic or assignment etc., you can use the “My Groups” tab. Right-click on “My Groups” to create a group. You can also create a “Smart Group” which creates groups for you based on a criteria subset you choose, for example, authors, publication dates, titles etc.

The name of the group that was created can be changed at any time by double clicking on said group name. References can be dragged to and from groups at any time. You can also right-click on the reference(s), select “Add References To” and choose the group you want them to move too.

The first screenshot shows the 'My Groups' list on the left sidebar. The group 'dogs are better' is highlighted with a red circle. The second screenshot shows the 'All References' list with a right-click context menu open. The 'Add References To' option is circled in red, and a red arrow points to the 'dogs are better' group in the 'My Groups' list on the right. The third screenshot shows the 'Add References To' submenu with 'dogs are better' circled in red.

If you want to delete a group, the following message should come up. The references should not be deleted.

CITE WHILE YOU WRITE (CWYW) – MICROSOFT WORD

Cite While You Write (CWYW) is a feature in EndNote that integrates with Microsoft Word to help you add and format citations and bibliographies as you work on your document. When you install EndNote, it should automatically add the "Cite While You Write" plugin to Microsoft Word, often seen as the "EndNote 21" tab. If the plugin is not showing up, try restarting your device and then check again.

To use the CWYW feature, the EndNote application needs to remain open on your computer. There are a few ways in which you can add references to your writing in Word.

1 EndNote 21 → Insert Citation → Insert Citation...

2 EndNote 21 → Insert Citation → Insert Selected Citation(s)...

- 1 The “EndNote Find & Insert My References” box will appear when “Insert Citation...” is clicked. Use the search bar to find the reference, usually by year or author, and click on said reference. If you want to insert the **normal format (author and date)**, click insert. If you only want the **Authors’ name or the year** it was published, choose that option in the dropdown list.

The citation will be inserted at the location of your cursor when you select the reference. The full reference will be added to the end of the document, forming the bibliography list. The CWYW feature ensures that all references cited in the document are included in the bibliography, usually in alphabetical order.

Note: If you cite the same reference multiple times within the document, it will appear only once in the bibliography list.

- 2 The other method to insert a citation requires more interaction with the EndNote application. Firstly, go to the EndNote application, and select the reference you want to add to your document by clicking on it.

The screenshot displays the EndNote 21 application window. The left sidebar shows the 'All References' group selected. The main pane shows a list of references under the 'All References' tab. A mouse cursor is clicking on the reference by González-Ramírez, M. (2021). The right pane shows the details of the selected reference, including the title 'Pet-Human Relationships: Dogs versus Cats', authors, journal information, and a summary of the article.

Then return to your Word document and click “Insert Citation” then “Insert Selected Citation(s)”. This will add the highlighted reference from EndNote into your Word document as a citation where your cursor was placed. This can also be achieved by clicking the quotation mark symbol in EndNote when you select a reference.

Note: This method is a great way to add 2 or more references into 1 in-text citation when required. See example below.

Interrelationships of dogs (Canis familiaris) and cats (Felis catus L.) living under the same roof

N. Feuerstein and J. Terkel

Applied Animal Behaviour Science 2008 Vol. 113 Issue 1 Pages 150-165

DOI: <https://doi.org/10.1016/j.applanim.2007.10.010>

<https://www.sciencedirect.com/science/article/pii/S0168159107003590>

In the process of domestication, dogs (Canis familiaris) and cats (Felis catus L.) have undergone thousands of years of genetic changes that have adapted them to the human environment. Both species have acquired a global distribution and it has become quite common to find homes with the two living side by side. Nevertheless, there is widespread belief that

ENDNOTE WEB

EndNote Web link: <http://myendnoteweb.com/>

EndNote online is a cloud-based reference management tool that complements the EndNote desktop app. It allows you to sync between the online version and the desktop app, share libraries and organise references. It is best to use this option if you are using another device that doesn't have your EndNote desktop app installed, or if you are working collaboratively.

To get started, create an account with EndNote Web. Once you have registered and logged in, this is what the home page will look like:

Syncing Your EndNote Web with Your EndNote Desktop

To sync between your libraries, first, you navigate to “Library” in the EndNote desktop app. Then you click on “Sync”, which will open a secondary log-in box. Enter your credentials that you used to create your EndNote Web. Accept the user registration agreements, and then click on “Sync”.

The screenshot shows the EndNote 21 desktop application interface. The 'Library' menu is open, and the 'Sync' option is highlighted with an orange circle and an arrow. The main window displays a list of references with columns for Journal, Last Updated, and Reference Type.

Journal	Last Updated	Reference Type
Applied Animal Behaviour Science	27/10/2025	Journal Article
Electronic Book	14/10/2025	Electronic Book
Animals (Basel)	27/10/2025	Journal Article
Learning and Individual Differences	14/10/2025	Journal Article

The EndNote Login dialog box is shown, prompting the user to create a new EndNote account or log in. It includes fields for E-mail Address and Password, and a 'Sign Up' button.

The EndNote Registration dialog box is shown, indicating that registration is complete. The 'Sync' button is highlighted with an orange circle and an arrow.

When the 2 libraries have synced and you have the same reference in both libraries, the reference may duplicate in your desktop app. To fix this, click on “Library” and then “Find Duplicates”. This will create a pop-up box for you to look at any duplicates that may be present, so you can organise them accordingly.

When using the 2 different EndNote variants, ensure you are regularly syncing the libraries. To do this, navigate to “Sync Status” above “All References” in the side menu. Then click “Sync Now”.

Adding References to EndNote Web

There are a few methods to add a reference to EndNote Web.

If you need to add a **brand new reference** and need to do it **manually**, your first step is to click on “Collect” in the main top bar menu. Then click on “New Reference” – this will open up the menu below where you can choose your reference type, and fill out the necessary information.

The screenshot shows the EndNote Web interface. The top navigation bar includes 'My References', 'Collect', 'Organize', 'Format', 'Match', 'Options', and 'Downloads'. Below this, a secondary bar contains 'Online Search', 'New Reference', and 'Import References'. The 'Collect' and 'New Reference' items are circled in orange. On the left, a 'Quick Search' sidebar is visible. The main area is titled 'New Reference' and contains a 'Bibliographic Fields' section with a 'Cancel' button and a 'Reference Type' dropdown menu set to 'Generic'. An orange arrow points to this dropdown menu. Below the dropdown are various input fields for bibliographic information: Author, Title, Year, Secondary Author, Secondary Title, Place Published, Publisher, Volume, Number of Volumes, Number, Pages, Section, Tertiary Author, Tertiary Title, and Edition. A note states: 'Note: The above fields are needed for most bibliographic styles.' At the bottom, there is an 'Attachments' section and 'Optional Fields' for Abstract and DOI.

Ensure you select the appropriate reference type!

To add a reference that you have downloaded the file for (e.g., RIS File), select “Import Reference” under the menu option “Collect”. Ensure the “Import Option” is set on “EndNote Import”. Then, click on “Choose File” and locate the correct file in your computer's downloads folder, and then add it. The “To” section determines where in EndNote Web you want the reference located. If you don't want it in a specific group, select “Unfiled”. To find your references, navigate to the main top menu bar, and select “My References”.

The image illustrates the process of importing a reference into EndNote Web through three sequential screenshots:

- Import References Page:** The top navigation bar shows 'My References', 'Collect', 'Organize', 'Format', 'Match', 'Options', and 'Downloads'. The 'Collect' menu is circled, and 'Import References' is selected. The 'Import References' form shows 'Importing from EndNote?' with 'File: Choose file' and 'No file chosen'. The 'Import Option' is set to 'EndNote Import' (circled), and the 'To' dropdown is set to 'Unfiled' (circled). An orange arrow points from the 'EndNote Import' dropdown to the file selection dialog.
- File Selection Dialog:** A file explorer window shows the 'Downloads' folder. A file named 'citation-354722780.ris' (RIS File, 1 KB) is selected. The file name is entered in the 'File name' field at the bottom.
- My References Page:** The 'My References' page shows a 'Quick Search' bar and a list of references. The 'All My References (4)' link is circled. The list shows 'Unfiled (1)' and 'Quick List (0)'. The 'All My References' section shows a table with columns 'Author' and 'Year', listing 'Feuerstein, N.' from 2008.

Checking for Missed Citations/References

EndNote Web has a cool feature in which you can check your document to see if you have any unmatched or ambiguous citations. This is unlikely to happen if you are using the CWYW function, but it is always good to check! For more information on how this works, click [here](#).

Navigate to the “Format” option in the menu, and then “Format Paper”. To see how this function works, it is suggested to download the sample paper and enter it, which is what was done in this example.

 not found: Whiting, 1987

Exporting References from EndNote Web to EndNote App

If syncing EndNote libraries is not an option, the references in EndNote Web can be exported. To do this, navigate to “Format” and then “Export References”. Choose which references you would like to export, and select “EndNote Export” as the export style. You can either save this file or email it – this is up to you!

Note: Exporting the references from EndNote Web saves the files in text format (txt). Txt files can be imported into EndNote desktop by navigating to “File” then “Import” and then selecting the “File” option. Adjust the import settings for your needs:

Exporting the Bibliography (Reference List)

EndNote Web allows users to create a reference list from the references in their online library. To do this, select “Format” and then “Bibliography”. Ensure you enter the correct settings in terms of which references you want, the style (e.g., APA 7) and the file format – it is recommended to use the RTP (rich text file) so nothing is missed. You can then download or email this file. Please check with your university referencing guide that there are no discrepancies.

ENDNOTE CLICK

EndNote Click is an internet browser plugin that allows users to easily and quickly access PDFs for the sources they are researching.

How does it work?

Subscription and Open Access combined

EndNote Click harnesses your library subscriptions to get you the highest quality PDFs. When your subscriptions do not grant you access, EndNote Click will search for an open access alternative from its vast database of Open Access articles.

One-click access to PDFs on article pages

When you visit an article page on any academic website, EndNote Click searches for full text PDFs and gives you one-click access via a button that is in a consistent, convenient place.

One-click access to PDFs from search pages

When using various academic search engines such as Web of Science and PubMed, EndNote Click searches for full texts PDFs and gives you one-click access.

You will need to create an account to use EndNote Click, which you can then access on other devices if needed. This plugin also allows you to save PDFs that are located in your “Locker” so you can access them at any time. EndNote Click will not locate PDFs for every source, as access is contingent on the availability of said source.

Example

Once you begin researching for sources, especially journal articles, the EndNote Click pop-up will appear on the left hand bottom of your screen. Hover your mouse over the “View PDF” to see the availability options. To open the PDF, simply click on the purple pop-up.

The screenshot shows the MDPI Animals journal article page for the article "Pet-Human Relationships: Dogs versus Cats" by Mónica Teresa González-Ramírez and René Landero-Hernández. The article is published in *Animals* 2021, 11(9), 2745. The page includes a search bar, navigation links, and a sidebar with article details. An EndNote Click pop-up is visible in the bottom left corner, showing options to view the PDF, add it to the locker, and check for publisher PDF and open access availability.

Simple Summary
Human-animal interactions have been the focus of research in recent decades, with the primary interest being the dog-owner relationship. The cat-owner relationship has not been as well studied, nor has the comparison between the two types of relationships. To compare these relationships, 132 people residing in Mexico who lived with both dogs and cats were evaluated. The results of the study indicate that the perceived relationship that an individual has with cats is better than that with dogs because the perceived cost of the relationship is greater with dogs and the interaction is greater with cats. However, the emotional closeness that occurs in the relationship is greater with dogs.

Simple Summary: Human-animal interactions have been the focus of research in recent decades, with the primary interest being the dog-owner relationship. The cat-owner relationship has not been as well studied, nor has the comparison between the two types of relationships. To compare these relationships, 132 people residing in Mexico who lived with both dogs and cats were evaluated. The results of the study indicate that the perceived relationship that an individual has with cats is better than that with dogs because the perceived cost of the relationship is greater with dogs and the interaction is greater with cats. However, the emotional closeness that occurs in the relationship is greater with dogs.

Abstract: The study of human-animal interactions has increased, focusing on the dog-owner relationship, leaving a lag in research on the cat-owner relationship and practically a total absence of studies that compare the dog-owner relationship with the cat-owner relationship. Therefore, the objective of the present study was to make this comparison based on the perception of people living with both dogs and cats, considering interaction, emotional closeness, and perceived cost of the relationship. A total of 132 residents in Mexico participated. To evaluate the pet-human relationship, the dog and cat versions of the Monash dog owner relationship scale were used, thus obtaining comparable scores for the relationship with dogs and cats. Based on what the owners reported, significant differences were found. Relationships with cats were better than relationships with dogs.
